| 17B-5 | Annual Accounting for Additional Extractions of New Conservation Water From the San Bernardino Basin Area by San Bernardino Valley Municipal Water District |

INTRODUCTION

The Annual Report of the Western-San Bernardino Watermaster for calendar year 2012 as amended dated September 6, 2013 included modification of most of the tables in the summary report. Many of the modifications resulted in changes in logic as well as the specific data commencing in calendar year 1971 and continuing through calendar year 2011.

The Judgment requires the Watermaster to report compliance based on calculations for the current year and the five year period ending with the current year. As a result, some tables only show data for the last five years. A few show data for all years commencing in 1971.

Since many of the modifications changed calculations all the way back to 1971 and some tables in the report only show the last five years, these appendices have been developed primarily to show all the revised historic calculations in any table that has been either modified or is affected by modification of another table. For any such table included in these appendices, the data is shown for the entire period of record 1971 through the current year.

Secondary reasons for these appendices are related to Watermaster's interest in making the report more useful to users that rely on it for basic data necessary for water resource related studies and analyses. All the data in the appendices are in PDF format and can be readily copies or converted to other formats electronically.

In the past, most of the more than forty years of data could only be acquired by accessing eight individual annual reports; each containing a five year block of data. Therefore, all pertinent historic data used to determine compliance with the provisions of the Judgment is available at a glance in electronic format in Appendix A. Appendix A includes summary report Table Nos. 2 through 18.

INTRODUCTION

The Annual Report of the Western-San Bernardino Watermaster for calendar year 2012 as amended dated September 6, 2013 included modification of most of the tables in the summary report and several tables in Report of Watermaster, Volumes 1 and 7. Many of the modifications resulted in changes in logic as well as the specific data commencing in calendar year 1971 and continuing through the current year.

The Judgment requires the Watermaster to report compliance based on calculations for the current year and the five year period ending with the current year. As a result, some tables only show data for the last five years. A few show data for all years commencing in 1971.

Since many of the modifications changed calculations all the way back to 1971 and some tables in the report only show the last five years, these appendices have been developed primarily to show all the revised historic calculations in any table that has been either modified or is affected by modification of another table. For any such table included in these appendices, the data is shown for the entire period of record 1971 through the current year.

Secondary reasons for these appendices are related to Watermaster's interest in making the report more useful to users that rely on it for basic data necessary for water resource related studies and analyses. All the data in the appendices are in PDF format and can be readily copies or converted to other formats electronically.

Appendix B includes tables with basic source data commencing in 1971 that are affected by the modifications made in 2013. These tables are in Report of Watermaster Volume 1 and Volume 7.

Volume 1 is modified to more accurately account for the high groundwater mitigation program and the Big Bear Lake in-lieu exchange. Table No. 8, including data for all years commencing in 1971, is included in Appendix B.

Volume 7 is modified to comply with provision of the Judgment related to export from the San Bernardino Basin Area by users in San Bernardino

County and to preserve the hydrologic integrity of the Basin. Numerous tables from Volume 7 have been added and are also included in Appendix B.

Column explanation:

- (2) Verified extractions, Volume 1, Report of Watermaster. Excludes Lytle Creek Diversion Recordation No. 3601718. Includes Well Recordation No. 3601085 after acquisition by City of Rialto.
- (3) Metered inflow to City of Rialto Filter Plant City of Rialto Records. Includes water delivered under stock entitlement City of Rialto
- owns in West San Bernardino County Water District and purchases from Fontana Union Water Co. (Rialto Filter Plant 3601718)

 (4) Verified extractions, Volume 2, Report of Watermaster. Includes production of Wells Recordation Nos. 3602269 & 3602271 after acquisition by City of Rialto.
- (5) City of Rialto Records of Purchases. Purchases from SBVMWD Baseline Feeder commencing 1990.
- (6) Sum Columns (2) + (3) + (4) + (5).
- (7) Well Recordation No. 3602270 acquired by City of Rialto in 1966 and a well constructed by City of Rialto (3603175 & 3603537)
- (8) Sum Columns (6) + (7)
- (9) Metered deliveries in Chino Basin from City of Rialto Billing Records beginning 1971. Base period years revised during 1973 verification to reflect 18% average distribution of metered deliveries by City of Rialto records for years 1971 through 1974.
- (10) Same as Column (7).
- (11) Difference Column (9) minus Column (10).
- (12) Assumed for Base Period. 1971 to date estimated weighted average return flow percentage based on: 1) metered agricultural and park deliveries with no return flow, 2) metered residential deliveries at 40 percent return flow, and 3) metered industrial deliveries (Phototron Company) at 90 percent return flow. In May 2009 a detailed study was completed which is described in text on previous page.
- (13) Product Column (11) times Column (12).
- (14) Difference Column (11) minus Column (13) net export of water produced in San Bernardino & Colton Basin Areas to Chino Basin.
- Note: Table No. 3 revised during the 1973 verification.
 - In May 2009 a detail calculation of water delivery and return was completed using data from Rialto's water meter books by Steve Mains Columns 9 and 12 data was adjusted for 2004, 2005, and 2006
