EXPLANATION OF NODE NUMBERS

The boundary of the 103 node basin as defined in the TRW Groundwater Program is not coincident with the boundary of the San Bernardino Basin as defined for safe yield determination in the Western Municipal Water District court settlement. In order to make use of the data available from the TRW Groundwater Program some of its nodes were modified or left out and some new nodes were added. The modifications are noted as follows:

1. Numbers of nodes with no alterations were left unchanged; e.g., 1.
2. Numbers of new nodes are preceded by a 3; e.g., 3104.
3. Numbers of nodes whose land area was decreased to eliminate areas outside the San Bernardino Basin are preceded by a 4; e.g., 4002.
4. Numbers of nodes outside the San Bernardino Basin are preceded by a 5; e.g., 5060.

Standard Land Use Survey Legend

May 8, 1953
Slightly Revised May 8, 1956
Revised June 7, 1957

By use of the appropriate symbol from the attached legend, various degrees of detail of mapping can be obtained.

The minimum breakdown of land use would be according to the "Class" symbol. More detail can be delineated by adding the subclass number to the class symbol, or by use of other symbols. Any or all of the following information can be delineated.

- 1. Irrigated and/or nonirrigated lands.
- 2. Crop or land use by class or subclass.
- 3. Number and kind of crops each year.
- 4. Intercrop or covercrop practices.
- 5. Sources of water supply.

Further breakdown can be added if further detail is desired.

UV--Vacant

(Should not be used without subclass unless specified)

- 1. Miscellaneous unpaved areas (vacant lots, graveled surfaces, playing fields, nonirrigated freeway strips, raw lands within metropolitan areas, etc.)
- 4. Miscellaneous paved areas (parking lots, runways, freeways, oiled surfaces, flood control channels, tennis court areas, auto sales lots, etc.)

RECREATIONAL CLASSES

RR--Residential

Permanent and summer home tracts within a primarily recreational area. The estimated number of houses per acre is indicated by a number in the symbol.

Example: RR-3 (3 homes per acre)

RC--Commercial

Commercial areas within a primarily recreational area. (Includes motels, resorts, hotels, stores, etc.)

RT--Camp and Trailer Sites

Camp and trailer sites within a primarily recreation area.

ADDITIONAL SYMBOLS

i--Irrigation

Denotes an irrigated crop and precedes class symbol.

Example: iG1 - irrigated barley

Note: Refer to Fallow, idle, and abandoned for special uses of "i."

n--Dry Farm

Indicates a dry farmed crop and precedes class symbol.

Example: nG1 - dry farmed barley

S--Seed Crop

Indicates any crop grown for seed and is used following crop symbol.

Example: iPl-S, irrigated alfalfa seed crop

--Y--Young Nonbearing Orchards and Vineyards

Follows crop symbol.

Example: iC3-Y, young nonbearing irrigated oranges

A--Abandoned Orchards and Vineyards

Trees or vines must be in such a condition that renewal of cultural practices would restore economic production. Indicated by "A" following crop symbol.

Example: iD1-A, indicates an apple orchard previously irrigated but now abandoned.

F--Fallow Lands

Must be tilled at time of survey.

1. If no crop residue is apparent or identifiable then the "F" symbol will follow the agricultural class symbol for the crop most representative of those grown in the area.

Example: iTF - fallow truck crop land (with facilities for irrigation)

2. If the crop residue is apparent and identifiable but is not from the current crop season covered by the survey then the field is considered fallow and mapped as the class of the crop residue.

Example: Surveyor found an old sugar beet residue not from current season. Land would be mapped iFF.

3. However, if the crop residue is identifiable as that of a crop which was grown during the survey period, then map the field as though crop existed.

Example: iT6 - carrot residue from current growing season

Z--Reclamation

Lands being leached for the removal of harmful salts. This symbol will be used following either the "Idle" symbol or symbols of crops grown as a step in the reclamation process.

Examples: iI2-Z, IR-Z

M--Military Areas

Indicates lands owned or controlled by the military and is used following the land use symbol.

Example: iF1-M, irrigated cotton within a military area

B--Burned Over Areas (not mapped unless specified)

Indicated by "B." The type and density of natural cover destroyed by fire is obtained by examination of aerial photo.

Example: NV2-B

P--Parks

Indicates all types of parks, both public and private and is used following the land use symbol.

Example: iS4-P, irrigated lawn area within a park

X--Partially Irrigated Crops

Crops irrigated for only part of their normal irrigation season.

Example: iP3-X, partially irrigated mixed pasture

(a,b,c,d)--Growing Season

Indicated by appropriate symbol following crop symbol:
"a" - spring; "b" - summer; "c" - fall; "d" - winter

Example: iT12-d winter potatoes; iT12-a spring potatoes

(fraction)--Intercropping

Indicated by a fractional symbol. The crop symbol appearing first in order in the preceding legend will be mapped in the numerator.

Exception: When orchard or vineyard is intercropped with some other crop class, the orchard or vineyard symbol will appear in the numerator.

Examples: $\frac{D5}{G1}$ Peaches intercropped with barley $\frac{D5}{D13}$ Walnuts intercropped with peaches

(percentages)--Mixed Land Use

Indicated by percentages following land use symbols. No more than 3 symbols are to be used in describing the area.

Example: iD5 - 40
 NV - 20
 UC32 - 40

For additional information, refer to "Additional Symbols" on page 9 of the discussion of the land use legend.
