VERIFIED EXTRACTIONS  
FROM THE SAN BERNARDINO BASIN AREA  
BY NON-PLAINTIFFS FOR USE WITHIN  
SAN BERNARDINO COUNTY FOR CALENDAR YEARS  
1959-1963 & 2012-2016

INTRODUCTION

The provisions of Paragraphs V(b) and VI(c) of the Judgment in Case No. 78426 entered April 17, 1969, entitled "San Bernardino Valley Replenishment," provide as follows:

V(b) "The total actual average annual extractions from the San Bernardino Basin Area by entities other than Plaintiffs for use within San Bernardino County for the five-year period ending with 1963 are assumed to be 165,407 acre-feet; the correct figure shall be determined by the Watermaster as herein provided."

VI(c) "San Bernardino Valley shall provide imported water for replenishment of the San Bernardino Basin Area at least equal to the amount by which extractions therefrom for use within San Bernardino County exceed during any five-year period the sum of: (a) five times the total average annual extractions determined under Paragraph V(b) hereof, adjusted as may be required by the natural safe yield of the San Bernardino Basin Area; and (b) any new conservation to which users within San Bernardino Valley are entitled. Such replenishment shall be supplied in the year following any five-year period; provided that during the first five-year period, San Bernardino Valley shall supply annual amounts on account of its obligations hereunder, and such amounts shall be not less than fifty percent of the gross amount of excess extractions in the previous year."

Compliance with these provisions of the Judgment requires an annual accounting of the total actual extractions of surface and groundwater within the San Bernardino Basin Area. Included in this Volume 1-2016 is the verified accounting of such production by non-plaintiff owners for the calendar year 2016. The

verified production for the five-year base period ending with 1963 and the verified production for calendar years 2012, 2013, 2014, 2015 and 2016 are also included.

Three indexes are included which provide a cross index by owner's name, State Water Resources Control Board Well Recordation Number, and State Well Number. In addition and where known, each index shows the local designation of each well and the groundwater basin in which the well is located.

Tables No. 1 and No. 2 in this report list the individual wells by the owner for each year in the five-year base period ending in 1963, the five-year base period average, the extractions for the years 2012 through 2016, the five-year average for that period and the owner's total annual verified extractions. Table No. 1 lists the wells upon which filings have been made with the Watermaster, and Table No. 2 lists the wells upon which no filings have been made.

Table No. 3 is a summary of the verified extractions, by owner, as presented in Tables No. 1 and No. 2.

Table No. 4 contains the total verified Lytle Creek stream diversions by Fontana Union Water Company, West Valley Water District, City of Rialto, City of San Bernardino and Mount Vernon Water Company. The total verified Lytle Creek stream diversion takes into account, and excludes, the return flow to Lytle Creek from the Fontana Power House afterbay.

Table No. 5 contains the verification of the Mill Creek stream diversions by month.

Table No. 6 contains the verification of the Santa Ana River stream diversions by month.

Table No. 7 shows the reported diversions by entity from the major streams in San Bernardino Basin Area, namely, Lytle Creek, Mill Creek and Santa Ana River. Schematic diagrams of the diversion works on each of these three major streams are shown on Plates 1, 2, and 3.

Table No. 8 shows the total Verified Production of ground and surface water within the San Bernardino Basin Area. Table No. 8 was modified in the Annual Report dated September 6, 2013 to:

1. Show plaintiff extractions delivered to Orange County Water District under the high groundwater mitigation agreements.

2. Show in-lieu water deliveries of imported water to Bear Valley Mutual Water Company (BVMWC) pursuant to the 1996 agreement with Big Bear Municipal Water District.

As presented in the Annual Report dated September 6, 2013, non-plaintiff total extractions were recalculated from 1971 forward. The results of such recalculations are shown in Table No. 2 of the Annual Report.

Table No. 8 was further modified in the August 1, 2015 Annual Report by deleting the inclusion of in-lieu water deliveries (Footnote 7) from the determination of non-plaintiff total extractions. In 2014, San Bernardino Valley delivered both imported water and groundwater to BVMWC. So Watermaster developed a new methodology to account for both types of deliveries by showing the sum of deliveries as an obligation in Table No. 17 of the Annual Report and excluding imported water deliveries from total extractions in Table No. 8.

Non-plaintiff total extractions were again recalculated from 1971 forward and such recalculations are shown in Table No. 2 of the Annual Report.

The total Verified Production (ground and surface water) from the San Bernardino Basin Area by non-plaintiff owners for the calendar year 2016, excluding minor production, is 113,815 acre-feet as shown on the last line of Table No. 8.

**ERRATA**

Volume 1, Non-Plaintiffs, San Bernardino Basin Area

**July 2017** - The following is a summary of changes made to the CY 2016 report through verification work by Watermaster staff.

The following new wells were **added** to the files this year

None

The following well was **closed** during the year

3603057, City of Loma Linda, Richardson #1, 01S/04W-24C01S, site visit and email correspondence with owner staff (Gabriel Orozco)(see file), entered 7/6/17

The following wells were **re-opened** during the year

None

The following **changes** were made to well data information during the year

None

The following **backfilings/corrected filing** were made during the year

None

**July 2016** - The following is a summary of changes made to the CY 2015 report through verification work by Watermaster staff.

The following new wells were **added** to the files this year

3603976, Loma Linda University, Anderson IV, 01S/04W-25D008S, entered May 2016

The following wells were **closed** during the year

None

The following wells were **re-opened** during the year

3600313, Crafton Water Company, Nye, 01S/02W-29N1, Mike Huffstutler reported that the well was rehabilitated and requested that it be re-opened, entered June 2016

The following **changes** were made to well data information during the year

None

The following **backfilings/corrected filing** were made during the year

None

**June 2015** - The following is a summary of changes made to the CY 2014 report through verification work by Watermaster staff.

The following new wells were **added** to the files this year

None

The following wells were **closed** during the year

- 3603696, Hillwood, Cajon Creek Area D, 01N/05W-02N, received well completion report from Hillwood, destroyed 11/12/14, entered 05/18/15
- 3600580, Fontana Union Water Company, FU 25, 01N/05W-22F01S, destroyed in July 2012, entered 04/23/15
- 3601751, Hillwood, Alabama/Christina, 01S/03W-21E, Site visit in June 2015 showed no trace of well, County of San Bernardino supplied well destruction permit indicating agricultural well was destroyed on 07/15/09 (see file), entered July of 2015
- 3600458, Jacob Duncan, PS & B2, 01N/04W-36M01S, site visit with Jacob Duncan indicated that the well no longer exists; however, an SCE power pole with meter is still present but not operating—no visual sign of a well head, casing or equipment, entered 07/13/2015

The following wells were **re-opened** during the year

None

The following **changes** were made to well data information during the year

None

The following **backfilings/corrected filing** were made during the year

3600119, Montecito Memorial Park, 1, 01S/04W-26F01S, corrected 2013 from 298 af to 149 af per 2014 verification work  
3603949, Montecito Memorial Park, Montecito #2, 01S/04W-26F, corrected 2013 from 298 af to 149 af per 2014 verification work

**July 2014** - (The following was abstracted from the 2013 Water Extraction Report for Calendar Year, September 2013)

Changes made to CY 2013 Report

The following new wells were **added** to the files this year

None

The following 2 wells were **closed** during the year

3601253, City of Colton, #7, 01S/04W-08Q01S, noted abandoned in 2013 recordation filing notice, entered April 2014  
3602528, Baseline Gardens Mutual Water Company, #3, 01S/04W-35R01S, received well destruction permit from County Health, destroyed 09/26/13, entered 01/03/14

The following wells were **re-opened** during the year

None

The following **changes** were made to well data information during the year

3601684-, Terrace Water Co, Well #1 (was well #4), 01S/04W-08F12S, 12S added from old well log December 2013  
3601686, Terrace Water Co, Well #2 (was well #3), 01S/04W-08F14S, 14S added from old well log December 2013  
3603778, West Valley Water District, #08A, 01N/05W-36R06S, SWN corrected to 01N/05W-36H06S, original data entry error  
3603900, San Bernardino County Flood Control, 01S/002W-04N, name change from Domestic well No. 3 to Seven Oaks Dam Well, per owner request. May 2014

The following **backfilings/corrected filing** were made during the year

- 3603554, Barton Development c/o Lucky Farms, California St., 01S/03W-19A01S, corrected 2010 from 202 af to 345 af per 2013 verification
- 3600119, Montecito Memorial Park, 1, 01S/04W-26F01S, corrected from 155 af to 221 af per site visit in May 2014
- 3603949, Montecito Memorial Park, Montecito #2, 01S/04W-26F, corrected from 177 af to 221 af per site visit in May 2014
- 3601848, West Valley Water District, #15, 01S/04W-05E05S, corrected 2012 from 954 af to 1012 af to match monthly production spreadsheet per Jadeski 9/03/13
- 3603778, West Valley Water District, #08A, 01N/05W-36R06S, corrected 2012 from 67 af to 5 af to match monthly production spreadsheet per Jadeski 9/03/13

**April 2014** - (The following was abstracted from the 2012 Water Extraction Report for Calendar Year, September 2013)

Changes made to CY 2012 Report

The following 3 new wells were **added** to the files this year:

- 3603964, San Bernardino Valley MWD, 9th St-North, 01S/04W-05F002S, May 2013
- 3603965, San Bernardino Valley MWD, 9th St-South, 01S/04W-05F001S, May 2013
- 3603967, Larry Jacinto Farming, Sapphire, 01S/02W-20G xxS, June 2013

The following 6 wells were **closed** during the year:

- 0000010, Batchelor, diversion, 01N/04W-14R, could not field locate
- 0000014, Boucher, 01N/04W-14J, house has water meter but no backflow
- 0000063, Harrision Cyn, 01N/04W-13N, house has water meter but no backflow
- 0000148, Wallace, 01N/04W-14J, house has no water meter or backflow, assume Satoski is active well on property
- 0000153, Floyd Ward, Well #6, 01S/01W-18 M, no sign of facility on Google Earth
- 0000154, Floyd Ward, Lateral Spring #5, 01S/01W-1P, no sign of facility on Google Earth

The following **changes** were made to well data information during the year

- 0000306, City of San Bernardino, Sewer Plant #2 (originally named Blood Bank Road) corrected SW# from 01S/04W-22C to 22C04S per data from City and DWR. At one time well was also C02S. May 2013
- 3602759, City of Loma Linda, Mt View 1, 01S/04W-24A, added 01S to SW# per Loma Linda/DWR worksheet May 2013
- 3603057, City of Loma Linda, Richardson #1, 01S/04W-24C02S change to C01S per Loma Linda, DWR worksheet May 2013
- 3603058, City of Loma Linda, Richardson #2, 01S/04W-24C03S change to C02S per Loma Linda, DWR worksheet May 2013

**July 2013** Changes made to prior issues of Volume 1, in Volume 1 - 2011 Report

Table 8 has been modified to include certain additional extractions and deliveries of imported water as in-lieu water that are considered extractions

The following new wells were **added** to the files this year:

- 3603955, Loma Linda - City of, Richardson #5, 01S/04W-24B05S
- 3603956, Loma Linda - City of, Mtn. View #6, 01S/04W-24B04S
- 3603660, City of San Bernardino, Plant Process (Orange Show Road), 01S/04W-15P06S

The following wells were **closed** during the year:

- 3603141, San Bernardino Valley MWD, 9<sup>th</sup> Street, 01S/04W-04E01S

The following **changes** were made to well data information during the year:

- 3601003, West Valley Water District, New Raynor #4 (#13), 01S/04W-06H02S corrected from H01S per DWR well log records.
- 3603538, City of Rialto, City Well #4A, 01S/04W-06H04S, corrected from H03S per DWR well logs records.

The following **backfilings/corrected filings** were made during the year:

- 3600451, Trojan Groves (John Thomas), 01S/03W-15M, backfiled 1AF for 2010, +1 AF
- 3603554, 01N/03W-19A01S, Barton Development Company, 2010 corrected from 202 AF to 345 AF, +143 AF
- 3603655, City of Redlands, #38, 01S/03W-29Q01S, corrected 2010 production from 1,987 to 1,897 AF, number transposed -90AF

3603956, Loma Linda, City of, Mtn. View #6, 01S/04W-24B04S  
backfiled on 38.32 AF on First Notice, +38 AF

NOTES

- U.S.G.S. RECORDS OF SANTA ANA RIVER FLOWS
- REDLANDS WATER COMPANY TUNNEL IS AN INFILTRATION GALLERY WHICH INTERCEPTS SANTA ANA RIVER UNDERFLOW. DATA FROM SAN BERNARDINO VALLEY WATER CONSERVATION DISTRICT. FLOW SHOWN INCLUDES LINE NO. 12. OF THIS TABLE.
- EAST HIGHLAND CANAL AND NORTH FORK CANAL DIVERT WATER TO AGRICULTURAL USE MUNICIPAL USE AND LIMITED SPREADING. DATA FROM EAST VALLEY WATER DISTRICT AND SAN BERNARDINO VALLEY WATER CONSERVATION DISTRICT.
- THE CORPS OF ENGINEERS AND SOUTHERN CALIFORNIA EDISON COMPANY DIVERT WATER FROM REDLANDS TUNNEL UPSTREAM OF THE TUNNELS CONFLUENCE WITH REDLANDS CANAL WHICH IS UPSTREAM OF THE REDLANDS CANAL WEIR.  
STARTING WITH 2008, COUNTY FILING ANNUAL EXTRACTION AMOUNTS, RECORDATION #3603900

NOTES

- DATA FROM SAN BERNARDINO VALLEY WATER CONSERVATION DISTRICT RECORDS OF OPERATIONS OF REDLANDS CANAL WEIR AND REDLANDS CANAL AND BEAR VALLEY HIGHLINE.
- DATA FROM SAN BERNARDINO VALLEY MUNICIPAL WATER DISTRICT RECORDS OF OPERATIONS. SAN BERNARDINO VALLEY MUNICIPAL WATER DISTRICT COMPLETED ITS GREENSPOT HIGHLINE PIPELINE IN 1985.
- SANTA ANA NO.1 AND NO. 2 WELLS ARE LOCATED IN UPPER SANTA ANA CANYON AND PUMPED DIRECTLY TO POWER CANALS, DIVERSION OF STREAMFLOW AND WELL EXTRACTIONS ARE COMMINGLED. DATA FROM SAN BERNARDINO VALLEY WATER CONSERVATION DISTRICT.

IN 2016 VERIFICATION WORK USGS DATA CHANGED FROM PROVISIONAL TO FINAL

VOLUME 1A - 2016

CHAPTER I

PLAINTIFFS EXTRACTIONS FROM THE  
SAN BERNARDINO BASIN AREA FOR  
CALENDAR YEARS 1959-1963 AND 2012-2016

The provisions of Paragraph VI(b)3 of the Judgment in Case No. 78426 entered April 17, 1969, entitled "San Bernardino Basin Area Rights and Replenishment (Annual Adjusted Rights of Plaintiffs)" provides as follows:

VI(b)3 "In any five-year period, each Plaintiff shall have the right to extract from the San Bernardino Basin Area for use in each service area designated in Table B-1 an amount of water equal to five times its adjusted right for such service area; provided, however, that extractions by each Plaintiff in any year in any service area shall not exceed such Plaintiff's adjusted right for that service area by more than 30 percent."

Compliance with this provision of the Judgment requires that an accounting of the total actual extractions of surface and groundwater by the Plaintiffs-City of Riverside, The Gage Canal Co., Meeks & Daley Water Co., Agua Mansa Water Co., Riverside Highland Water Co., and the Regents of the University of California-from the San Bernardino Basin Area be made annually. Included in this Volume 1A-2016 is the verified accounting of such extractions by the Plaintiffs for the Calendar years 2012 through 2016. The extractions for the five-year base period ending with 1963 are also included for comparison.

Three indexes are included which provide a cross index by owner's name, State Water Resources Control Board Well Recordation Number, and State Well Number. Each index shows, in addition, the local designation of each well, if the file has been closed, which year that occurred, the last 5 years verified extractions and the average for those years.

## CHAPTER II

### PLAINTIFFS EXTRACTIONS FROM THE SAN BERNARDINO BASIN AREA FOR CALENDAR YEARS 1959-1963 AND 2012-2016 AND DISTRIBUTION BY SERVICE AREA

Paragraph XVI of the Judgment states:

"The provisions of Paragraph III and V through XII of this Judgment shall be in effect from and after January 1, 1971; and remaining provisions are in effect immediately."

Thus the annual accounting provisions which relate to extractions from the San Bernardino Basin Area by Plaintiffs were not effective until January 1, 1971.

Table No. 1 of Chapter II shows the extractions from individual wells owned by each Plaintiff for the five calendar year period ending with 1963, the annual average for said five-year period, and the extractions for the calendar years 2012 through 2016 and the annual average for that period.

Table No. 2 described in Chapter II summarizes the total annual extractions for each Plaintiff during the five-year period 1959 through 1963, the annual average for the five-year period, and the 2012 through 2016 extractions and the annual average. The total annual extractions for 2016 are 57,445 acre feet.

Table No. 3 shows total annual extractions and its distribution.

To facilitate the comparison of the total annual extractions as well as the portions thereof delivered within the San Bernardino Basin Area, the Colton Basin and Riverside Basin within San Bernardino County, and to areas outside San Bernardino Valley, four additional tables have been prepared which summarize the total annual extractions from the San Bernardino Basin Area for the period 1959 through 1963 and 1971 through the current year

for each Plaintiff, as well as the portions thereof delivered to various service areas described above.

Table No. 4 lists the Total Extractions from the San Bernardino Basin Area for each Plaintiff annually for the period 1959 through 1963 and the five-year average and calendar years 1971 through the current year.

Similar listings were made for the same period which shows the deliveries within the San Bernardino Basin Area, the deliveries to Colton and Riverside Basins within San Bernardino County, and the deliveries to areas outside San Bernardino Valley. These listings are shown on Table Nos. 5, 6, and 7 respectively.

Some tables and sections in the 2017 Annual Report may have data values that have been revised from previous annual reports. In 2014, the Watermaster began a database update and improvement process to enhance the well recordation program for both well owner and the Watermaster. As this transitional work progressed, comparisons of previously reported data were made using the old and new data processes. Where inconsistencies were found, methodical research was conducted to validate information used and based on available records, a determination was made by Watermaster to correct all information reported. Watermaster will develop specific data footnotes in future annual reports as appropriate and warranted.

## ERRATA

### Volume 1A, Bunker Hill Basin Plaintiffs

**During the 2016 Verification**, July 2017, the following changes were made to the report.

No changes were made.

**During the 2015 Verification**, June 2016, the following changes were made to the report.

The following new well was **added** to the files this year

3603975, City of Riverside, Raub 4-R, 01S/04W-23D008S, entered May 2016.

**During the 2014 Verification**, May 2015, the following changes were made to the report.

No changes were made.

**During the 2013 Verification**, May 2014, the following changes were made to the report.

The following new well was **added** to the files this year

3603968, City of Riverside - Gage Canal, Gage 31-1R, 01S/04W-13L009S, drilled February 2013, entered December 2013.

The following 2 wells were **closed** during the year

3600793, City of Riverside - Gage Canal, 30-1, 01S/04W13M02S, destroyed in 2013, entered December 2013.

3600794, City of Riverside - Gage Canal, 31-1, 01S/04W13F02S, destroyed in 2013, entered December 2013.

**During the 2012 Verification**, July 2013, the following changes were made to the report.

No changes were made.

VOLUME 2 - 2016

VERIFIED EXTRACTIONS FROM  
THE COLTON BASIN AREA FOR  
CALENDAR YEARS 1959-1963 & 2012-2016

INTRODUCTION

The provisions of Paragraph VIII(a) and VIII(b) of the Judgment in Case No. 78426 entered April 17, 1969, entitled "Extractions from Colton Basin Area and Riverside Basin Area in San Bernardino County" provide as follows:

VIII(a) "The average annual extractions from the Colton Basin Area and that portion of the Riverside Basin Area within San Bernardino County for use outside San Bernardino Valley for the five-year period ending with 1963 are assumed to be 3,349 acre-feet and 20,191 acre-feet, respectively, the correct figures shall be determined by the Watermaster as therein provided."

VIII(b) "Over any five-year period, there may be extracted from each such Basin Area for use outside San Bernardino Valley, without replenishment obligation, and amount equal to five times such annual average for the Basin Area; provided, however, that if extractions in any year exceed such average by more than 20 percent, Western shall provide replenishment in the following year equal to the excess extractions over such 20 percent peaking allowance."

Compliance with these provisions of the Judgment requires that an accounting of the total actual extractions of surface and groundwater within the Colton Basin Area and the Riverside Basin Area within San Bernardino County be made annually. Included in this Volume 2-2016 is the verified account of the production from the Colton Basin Area by owners for the calendar years 2012-2016. The verified production for the five-year period ending with 1963 and the five-year average is also included for comparison. The

five-year average production from the Colton Basin Area ending in 1963 was verified to be 11,731 acre-feet. Three indexes are included which provide a cross index by owner's name, State Well Number, and State Water Resources Control Board Well Recordation Number. In addition, each index shows the local designation of each well, if the file has closed, which year that occurred, and the last five-years of verified extractions and that period average.

Table Nos. 1 and 2 in this report list the individual wells by the owner for each year in the five-year base period ending in 1963, the five-year base period average, the extractions for the years 2012 through 2016, and the owner's total annual verified extractions. Table No. 1 lists the wells upon which filings have been made with the Watermaster, and Table No. 2 lists the wells upon which no filings have been made. Table No. 3 combines the wells in Table Nos. 1 and 2 and Table 3A is a summary of the verified extractions, by owner.

Paragraph VIII(a) of the Judgment requires that only those extractions from the Colton Basin Area which are used outside San Bernardino Valley be verified for the five calendar years ending with 1963 and accounted for annually from and after January 1, 1971. Accordingly, those extractions from the Colton Basin Area by Riverside County entities for the five calendar years ending with 1963 have been determined and are set forth in Table No. 4. Such extractions averaged 3,496 acre-feet for said five-year period, of which 3,381 acre-feet were delivered outside San Bernardino Valley.

Table No. 4 also shows the extractions from the Colton Basin Area for the 1959-63 base period and 1971 through the current year.

The verified extractions from the Colton Basin Area are as follows:

Year	Verified Extractions
Base Period Average	11,731 A.F.
1971	11,388 A.F.
1972	10,414 A.F.
1973	7,844 A.F.
1974	8,906 A.F.

2015	12,943 A.F.
2016	12,960 A.F.

- 1) Colton Well #24 reassigned from the Colton Basin Area to Riverside North in 1996.
- 2) Correction on Reche Canyon Mutual "Big Well" from 61 AF to 85 AF.
- 3) Corrected during 2001 verification, double counted La Sierra/Colton joint use of Wells 15 & 17
- 4) Corrected during 2002 verification, new San Gabriel Valley Water Company well F13B added
- 5) Corrected during 2003 verification, West Valley WD #33 discovered backfiled to 1994. See 2003 Errata.
- 6) Corrected during the 2009 verification, new owner Melchiorre added and back filed 1 AF from 2000-2009.
- 7) Corrected Managing Agency to have West Valley #54 and Montecito Memorial Park Barton Road wells appear in this volume. Back years 2005-2008 added.
- 8) Corrected during the 2014 verification, Reche Canyon Mutual Water updated Well #2 Adams-Big for 2012 and 2013.

The verified extractions by Riverside entities for 2016 have been determined to be 1,141 acre-feet of which 1,141 acre-feet were delivered outside San Bernardino Valley as shown on Table No. 4, beginning on page 27.

Table No. 5 shows the verified extractions from the Colton Basin Area by San Bernardino County entities during the five-year base period 1959 through 1963 and the calendar years 1971 through the current year.

Some tables and sections in the 2017 Annual Report may have data values that have been revised from previous annual reports. In 2014, the Watermaster began a database update and improvement process to enhance the well recordation program for both well owner and the Watermaster. As this transitional work progressed, comparisons of previously reported data were made using the old and new data processes. Where inconsistencies were found, methodical research was conducted to validate information used and based on available records, a determination was made by Watermaster to correct all information reported. Watermaster will develop specific data footnotes in future annual reports as appropriate and warranted.

**ERRATA**

Volume 2, Colton Basin

**During the 2016 Verification**, (July 2017), no changes were made to the report.

**During the 2015 Verification**, (June 2016), no changes were made to the report.

**During the 2014 Verification**, (May 2015)

The following backfilings/correct filings were made during the year

3302054, Reche Canyon Mutual Water, #2 Adams-Big, 02S/04W-11A02S, received water meter readings for 2012 and 2013;

Revising 2013 production from 66 AF to 49 AF. May 2015, Colton.  
Revising 2012 production from 64 AF to 51 AF. May 2015, Colton.

The following new well was added to the files this year

3603974, San Gabriel Valley Water Company, Well F10D, 01N/05W-32R001S.

**During the 2013 Verification**, (April 2014), no changes were made to the report.

**During the 2012 Verification**, (October 2013), no changes were made to the report.

VERIFIED EXTRACTIONS FROM  
THE RIVERSIDE BASIN AREA  
WITHIN SAN BERNARDINO COUNTY FOR  
CALENDAR YEAR 1959-1963 & 2012-2016

INTRODUCTION

The provisions of Paragraphs VIII(a) and VIII(b) of the judgment in Case No. 78426 entered April 17, 1969, entitled "Extractions from Colton Basin Area and Riverside Basin Area in San Bernardino County" provide as follows:

- VIII(a) "The average annual extractions from the Colton Basin and that portion of the Riverside Basin Area within San Bernardino County, for use outside San Bernardino Valley, for the five-year period ending with 1963 are assumed to be 3,349 acre-feet and 20,191 acre-feet, respectively; the correct figures shall be determined by the Watermaster as herein provided".
- VIII(b) "Over any five-year period, there may be extracted from over such Basin Area and for use outside San Bernardino Valley, without replenishment obligation, an amount equal to five times such annual average for the Basin Area; provided, however, that if extractions in any year exceed such average by more than 20 percent, Western shall provide replenishment in the following year equal to the excess extractions over such 20 percent peaking allowance."

Compliance with these provisions of the Judgment requires that an accounting of the total actual extractions of surface and groundwater from the Colton Basin Area and the Riverside Basin Area within San Bernardino County be made annually. Included in this Volume 3-2016 is the verified accounting of the production from the Riverside Basin Area in San Bernardino County by owners for the calendar years 2012 through 2016.

The verified production for the five-year period ending with 1963 and the five-year average is also included for comparison.

The five-year average production from the Riverside Basin Area within San Bernardino County ending in 1963 was verified to be 33,729 acre-feet.

Three indexes are included which provide a cross index by owner's name, State Well Number and State Water Resources Control Board Well Recordation number. In addition, each index shows the local designation of each well, if the file has been closed, which year that occurred, and the last five-years verified extractions.

Table Nos. 1 and 2 in this report list the individual wells by the owner for each year in the five-year base period ending in 1963, the five-year base period average, the extractions for the years 2012 through 2016, the five year average for that period and the owner's total annual verified extractions. Table No. 1 lists the wells upon which filings have been made with the Watermaster, and Table No. 2 lists the wells upon which no filings have been made. Table No. 3 combines the wells in Table Nos. 1 and 2 and Table 3A is a summary of the verified extractions, by owner.

Paragraph VIII(a) of the Judgment requires that only those extractions from the Riverside Basin Area in San Bernardino Valley be verified for the five calendar years ending with 1963 and accounted for annually from and after January 1, 1971. Accordingly, those extractions from the Riverside Basin Area in San Bernardino County by Riverside County entities for the five calendar years ending with 1963 have been determined and are set forth in Table No. 4. Such extractions averaged 24,120 acre-feet for said five year period, of which 21,085 acre-feet were delivered outside San Bernardino Valley.

Table No. 4 also shows the extractions from the Riverside Basin Area in San Bernardino County by the Riverside County entities for the 1959-63 base period and 1971 through the current year.

The verified extractions from the Riverside Basin Area in San Bernardino County for calendar years 1971 through the present year have been determined to be as follows:

Year	Verified Extractions
Base Period Average	33,729 A.F.
1971	29,070 A.F.
1972	28,148 A.F.
1973	21,809 A.F.
1974	21,881 A.F.
1975	22,701 A.F.
1976	24,705 A.F.
1977	23,506 A.F.
1978	17,216 A.F.
1979	20,024 A.F.
1980	18,533 A.F.
1981	23,611 A.F.

2013	23,953 A.F.
2014	20,550 A.F.
2015	16,997 A.F.
2016	20,426 A.F.

- 1) Corrected during 1988 verification (Holiday Sand & Gravel).
- 2) Corrected during 1989 verification (Owl Service Rock).
- 3) Corrected during 1993 verification (Owl Service Rock).
- 4) Corrected during 1996 verification (Colton #24 and Kleckler).
- 5) Corrected during 1998 verification (RIX and Corridor Land Co.).
- 6) Corrected during 2002 verification (backfile on RH and Cal Portland)
- 7) Corrected during 2008 verification (backfiled 115 AF for Roquet 1999-2007)
- 8) Corrected during 2008 verification (backfile Cal Portland #9 & Green Acres 8<sup>th</sup> St)
- 9) Corrected during 2009 verification (backfiled 210 AF for S.B. Co. Hospital 2000-2005)

The verified extractions by Riverside entities for 2016 have been determined to be 11,109 acre-feet, of which 10,044 acre-feet were delivered outside San Bernardino County as shown in Table No. 4.

Table No. 5 shows the verified extractions from the Riverside Basin Area in San Bernardino County by the San Bernardino County entities during the five year period 1959 through 1963 and the calendar years 1971 through the current year.

Some tables and sections in the 2017 Annual Report may have data values that have been revised from previous annual reports. In 2014, the Watermaster began a database update and improvement process to enhance the well recordation program for both well owner and the Watermaster. As this transitional work progressed, comparisons of previously reported data were made using the old and new data processes. Where inconsistencies were found, methodical research was conducted to validate information used and based on available records, a determination was made by Watermaster to correct all information reported. Watermaster will develop specific data footnotes in future annual reports as appropriate and warranted.

## **ERRATA**

### Volume 3, Riverside North Basin Area

**During the 2016 verification**, July 2017, no changes or corrections were made to the report.

**During the 2015 verification**, June 2016, no changes or corrections were made to the report.

**During the 2014 Verification**, May 2015, the following changes were made to the report.

The following 1 well was file closed this year

3601236, Riverside, City of, Agua Mansa, 01S/05W-36L01S.

**During the 2013 verification**, April 2014, no changes or corrections were made to the report.

**During the 2012 Verification**, August 2012, the following changes were made to the report.

The following 1 new well was added to the files this year

3603961, Riverside, City of, Flume 7, 01S/04W-32F005S.

The following **backfilings/corrected filing** were made during the year

3603598, City of Colton, Well #24, 01S/04W-18N03S, full SW# from DWR, September 2012.

3603704, City of Colton, Well #26, 01S/04W-08J02S, full SW# from DWR, September 2012.

3603957, City of Colton, Well #30, 01S/04W-29G01S, was mis-assigned to the Colton Basin, switched to Riverside North, July 2012.

3603958, City of Colton, Well #31, 01S/04W-29G02S, was mis-assigned to the Colton Basin, switched to Riverside North, July 2012.

VERIFIED EXTRACTIONS FROM  
THE RIVERSIDE BASIN AREA  
WITHIN RIVERSIDE COUNTY FOR  
CALENDAR YEARS 1959-1963 & 2012-2016

INTRODUCTION

The provisions of Paragraph IX(a) and IX(b) of the Judgment Case No. 78426 entered April 17, 1969, entitled "Extractions from the Portion of Riverside Basin Area in Riverside County which is Tributary to Riverside Narrows" provide as follows:

- IX(a) "The average annual extractions from the portion of the Riverside Basin Area in Riverside County which is tributary to Riverside Narrows, for use in Riverside County, for the five-year period ending with 1963 are assumed to be 30,044 acre-feet; the correct figures shall be determined by the Watermaster as herein provided."
- IX(b) "Over any five-year period, there may be extracted from such Basin Area, without replenishment obligation, an amount equal to five times such annual average for the Basin Area; provided, however, that if extractions in any year exceed such average by more than 20 percent, Western shall provide replenishment in the following year equal to the excess extractions over such 20 percent peaking allowance."

Paragraph IX(a) of the Judgment requires only that extractions from that part of the Riverside Basin in Riverside County which is tributary to the Riverside Narrows and used in Riverside County, be verified for the five calendar year base period ending in 1963. Accordingly, a verification of these extractions has been made, the results of which are shown in Table No. 3 beginning on page 34 and averaged 29,633 acre-feet for the five-year period ending with 1963.

Three indexes are included which provide a cross index by owner's name, State Well Number, and State Water Resources Control Board Recordation Number. In addition, each index shows the local designation of each well, if the file has been closed, which year that occurred, and the last five-years verified extractions.

Table Nos. 1 and 2 in this report list the individual wells by the owner, the owner totals for each year in the five-year base period ending in 1963, the five-year period average, and the extractions for the years of 2012-2016. Table No. 1 lists the wells upon which filings have been made with the Watermaster, and Table No. 2 lists the wells upon which no filings have been made. Table No. 3 combines the wells in Table Nos. 1 and 2 and Table 3A is a summary of the verified extractions, by owner.

Table No. 4 shows the total verified extractions from the Riverside Basin Area in Riverside County for use in Riverside County during the five year period ending in 1963 and for calendar years 1971 through the current year.

The judgment further provides in Paragraph XVI that the accounting is effective from and after January 1, 1971. The recent verified extractions from the Riverside Basin Area in Riverside County for calendar years 1971 through the current year have been determined to be as follows:

Year	Verified Extractions
Base Period Average	29,633 A.F.
1971	30,942 A.F.
1972	37,804 A.F.
1973	33,094 A.F.

- 1) Corrected during 1990 verification (Riv.Cement 60-1,Cof R Garner T&G,1st St)
- 2) Corrected during 1991 verification (Riv.Co. Pk, Edmund, wrong power meter #)
- 3) Corrected during 1993 verification (Riv.Cement 88-1)
- 4) Corrected during 2006 verification (Jurupa #21)
- 5) Corrected during 2007 verification (Hunter Engineering #3)
- 6) Starting in 2008, blow-off water from the City of Riverside Palymrita Treatment Plant that is returned to the groundwater basin in not counted as extraction. Volume 5, Table No. 2, Line (88).
- 7) 2008 & 2009 Riverside Unified Schools backfiled on new well
- 8) 2008 production total of 31,219 AF less 14 AF = 31,205 AF
- 9) 2009 production total of 35,541 AF less 22 AF = 35,519 AF
- 10) 2010 production total of 29,090 AF less 13 AF = 29,077 AF
- 11) 2011 production total of 30,528 AF less 18 AF = 30,510 AF
- 12) 2011 correction, -50 AF for City of Riverside Mori well
- 13) 2012 no blow off in 2012, all water went to Riverside Canal.
- 14) 2013 production total of 30,082 AF less 12 AF = 30,070 AF
- 15) 2014 production total of 31,256 AF less 11 AF = 31,245 AF
- 16) 2015 production total of 23,608 AF less 3 AF = 23,605 AF
- 17) 2016 production total of 25,175 AF less 1 AF = 25,174 AF

Some tables and sections in the 2017 Annual Report may have data values that have been revised from previous annual reports. In 2014, the Watermaster began a database update and improvement process to enhance the well recordation program for both well owner and the Watermaster. As this transitional work progressed, comparisons of previously reported data were made using the old and new data processes. Where inconsistencies were found, methodical research was conducted to validate information used and based on available records, a determination was made by Watermaster to correct all information reported. Watermaster will develop specific data footnotes in future annual reports as appropriate and warranted.

## ERRATA

### Volume 4, Riverside South Basin Area

During the 2016 verification, July 2017, no changes were made to the report.

During the 2015 verification, June 2016, no changes were made to the report.

During the 2014 verification, May 2015, no changes were made to the report.

During the 2013 verification, May 2014, no changes were made to the report.

During the 2012 verification, August 2013, the following changes or corrections were made to the report.

The following backfilings/corrected filing were made during the year

3300598, Riverside County Parks, Edmund "D", 02S/05W-21K, corrected 2011 production from 140 AF to 175 AF. From SCE data, October 2013.

## VOLUME 5-2016

### DISTRIBUTION OF EXTRACTIONS

The distribution of the verified extractions by the Plaintiffs and Riverside County entities from the San Bernardino Basin Area, Colton Basin Area, and Riverside Basin Area for the five calendar years ending with 1963 and the ensuing years 1964 through 1970 was presented in the Report of Watermaster, Volume 5, dated June 1972. That volume also included the distribution of extractions from the Colton Basin Area and that portion of the Riverside Basin Area within San Bernardino County made by San Bernardino county entities for the five calendar years ending with 1963 and the year of 1970.

The distribution of extractions in calendar years 1971, 1972, and 1973 was presented in separate reports as updates to the original Volume 5 dated June 1972. Changes in the distribution systems of the various water entities during the period 1971 through 1973, necessitated several revisions of the original Volume 5. Therefore, Volume 5 for calendar year 1974 was completely revised and updated to reflect these changes. As a result Volume 5 dated August 1976 now represents the most recent complete report on distribution of extractions including descriptions of each water system.

This report, Volume 5-2016 shows the distribution of extractions for calendar years 1971 through 2016 and is supplementary to the Volume 5 dated August 1976. Detailed computations and tables are used to show the distribution of extractions from Colton and Riverside Basin Areas by both Riverside and San Bernardino County entities and the Plaintiffs' extractions from the San Bernardino Basin Area.

The following Table of Contents lists the tables used to show the distribution of extractions. Table Nos. 5 through 7 and Nos. 23 through 27 did not require updating and therefore they are not included in this volume.

Tables Nos. 5 through 7 do not require updating because ownership changes within the service area of the Trujillo Water Company have occurred and since 1965 the entire service area of the Trujillo Water Company is within Riverside County and is served by water extracted from the Garner Well, situated in Riverside County and owned by the City of Riverside. These tables are presented in Volume 5 - 1974.

Table Nos. 9, 10, 11, 14 & 16 also no longer require updating due to changes in methods of operation of the various water suppliers.

Table Nos. 23 through 27 do not require updating because they contain data for years prior to 1963. These tables show the distribution of the Riverside Highland Water Company production from the San Bernardino Basin based on the assumption that 50 percent of the delivery was made in each county. This assumption results in the distribution shown on Table No. 27 and is identical with Table B-1, Appendix "B" of the Judgment. Following the settlement of the suit and the filing of the Judgment, the actual water deliveries in Riverside County were provided by the Riverside Highland Water Company. This information has been used by the Watermaster for the period 1964 through the current year, and results in the data shown in Table No. 31-A. Starting with calendar year 1990, Table Nos. 28-31 were replaced by Table No. 23R in an effort to better quantify the distribution of extractions for Riverside Highland Water Company. These tables are presented in Volume 5 - 1974.

Some tables and sections in the 2017 Annual Report may have data values that have been revised from previous annual reports. In 2014, the Watermaster began a database update and improvement process to enhance the well recordation program for both well owner and the Watermaster. As this transitional work progressed, comparisons of previously reported data were made using the old and new data processes. Where inconsistencies were found, methodical research was conducted to validate information used and based on available

records, a determination was made by Watermaster to correct all information reported. Watermaster will develop specific data footnotes in future annual reports as appropriate and warranted.

FOR YEARS PRECEDING 1971: Refer to Volume 5, August 1976, Page I-21.

\* Corrected during 1984 verification  
 \*\* Corrected during 2016 verification

- Column 1 Riverside Highland delivery made from water produced in the San Bernardino Basin Area. Water is commingled with production from other basins by RH and delivered by this company. See Riverside Highland tabulation for basin allocation of water production.
- Column 2 Salazar Water Company delivery made in San Bernardino County from the canal of the Riverside Water Company, which contains commingled water produced from Bunker Hill, Colton, and Riverside Basins, all within San Bernardino County. Delivery is made directly to the West Riverside Canal and transported by this canal directly to Riverside County southerly of the County Line.
- Column 3 Trujillo Water Company. For the period 1947 through a portion of 1952, deliveries were made to the Trujillo Water Company at a point in San Bernardino County from the Canal of the Riverside Water Company, which contained a commingled water supply produced from the Bunker Hill, Colton and Riverside Groundwater Basins, all within San Bernardino County. For this period a portion of the 1952 through 1965, deliveries to the Trujillo Water Company were made from the Williams Well, producing water from that portion of the Riverside Ground Water Basin lying within San Bernardino County. The service area of the Trujillo Water company lies astride the Riverside-San Bernardino County Line, and during both of the periods described above, water was delivered both in San Bernardino County and in Riverside County to shareholders entitled to received this water by ownership of Trujillo Water Company stock. In addition, deliveries were also made from the Williams Well for overlying use on the Williams Ranch, situated within San Bernardino County. Tabulations of this proecution and the inter-county deliveries are shown in detail on Table Nos. 4, 5, 6, and 7.
- Column 4 Deliveries to the Jurupa Ditch Company are made directly from the production from the Jurupa Wells, situated within the San Bernardino County in the Riverside Groundwater Basin and exported across the County Line to Riverside County. Deliveries for overlying use in San Bernardino County are also made from these wells for use on the Jurupa Ranch in San Bernardino County. A tabulation of overlying use from the Jurupa Wells within San Bernardino County and exported to Riverside County are shown in Table No. 8. No other breakdown is required.
- Column 5 Water delivered to the Southern California Edison Company Highgrove Power Plant was delivered from 1952 though 1963 from commingled water supply in the Riverside Water Company Canal, which was produced entirely with San Bernardino County from the Bunker Hill, Colton and Riverside Groundwater Basins. An allocation of this production, by basin, is shown in Table No. 10.
- Column 6 The Pellissier Ranch, which is owned by the City of Riverside, overlies that portion of the Riverside Groundwater Basin situated within San Bernardino County, and water is produced by wells located therefor for overlying use within San Bernardino County. The production from these wells is shown in Table No. 2, Line 21.
- Column 7 Change of ownership to Stapakis, William S., in calendar year 1974.
- Column 8 The delivery to the City of San Bernardino was made during the years of 1959 and 1960 from water produced in the Bunker Hill Basin from the Garner Wells.

FOR YEARS PRECEDING 1971: Refer to Volume 5, August 1976, Page 1-58.  
 L.C. #2, R.H. #8, Flowing, #10, #11 were abandoned &/or Filed Closed before 1971.  
 ° Abandoned &/or File Closed.

\* 1984 L.C. flowed artesian during the year, RH filed on pumped total of 1,891 af. Watermaster calculated 2300 af as reasonable.  
 \*\* 1985 Filed 2,748. Large known loss near well site of 868 af.

Column (5) = Column (2) + (3) + (4).  
 Column (15) = Sum of Columns (6) thru Column (14).  
 Column (16) = Column (5) + Column (15).  
 Adjusted Base Right from Annual Report, Table 11

This table show all production "booked" against RH including the water going directly into Cof R system

Column (2) = From City of Riverside Table 1, Line 69K

Starting in 2008, this is Riverside lease from Riverside Highland

Column (3) = From Riverside Highland Co. records

Starting in 2013, this is RH lease water to Western MWD

Column (4) = Column (2) + Column (3)

Column (5) = From Table 19, Column (16).

Column (6) = From Table 20, Column (4).

Column (7) = From Table 21, Column (10).

Column (8) = From Table 21, Column (15).

Column (9) = Columns (5) + (6) + (7) + (8).

Column (10) = Column (4) + Column (9).

The following Tables are not needed  
after the Base Period Verification Work

**Riverside Highland Water Company**

**Tables Numbered 23, 24, 25, 26, 27**

**see Volume 5-1974 for data**

Replaced by Table 23R starting with 1990.

Columns (2), (3), (4), (5), (6), (10) & (12) are from Company Records, "Condensed Water Summary".

Column (2) Includes water delivered by other companies.

Columns (7) (8) (9) See Notes.

Columns (11), (13), (15), (16) See Worksheets.

Column (14) = Column (11) + Column (13).

Column (17) = Column (15) + Column (16).

\* Assumed domestic loss at 15% with Column (7) as total system loss.

\*\* Assumed domestic loss at 20% with Column (7) as total system loss, known loss in L.C. Line of 868 af.

° Assumed domestic loss at 25% with Column (7) as total system loss.

°° Assumed domestic loss at 24% with Column (7) as total system loss.

FOR YEARS PRECEDING 1971: Refer to Volume 5, August 1976, Page I-73.

General Notes:

- (a) Production shown is from Well 1S/4W-18G. This well is owned by City of Colton and no production from this well was made by La Sierra Water Co. prior to 1964. Beginning in 1964, production by Colton recorded under 3601259 and by La Sierra under 3602227.
- (b) Production shown includes water from 1S/4W-18F. This well is owned by the City of Colton and no production from this well was made by La Sierra prior to 1964. Beginning in 1964, production by Colton recorded under 3601261 and by La Sierra under 3602228.
- (c) La Sierra Well No. 10 delivered directly to Edison steam plant in Highgrove 1959-63. Beginning in 1964, Temescal Water Co. in Riverside County purchased the flow of La Sierra No. 10 Well from Southern California Edison Company.

FOR YEARS PRECEDING 1971: Refer to Volume 5, August 1976, Page III-21.

SECTION I

VERIFIED EXTRACTIONS FROM THE  
SAN BERNARDINO BASIN AREA, COLTON BASIN AREA,  
AND RIVERSIDE BASIN AREA FOR USE WITHIN WESTERN  
ON LANDS NOT TRIBUTARY TO THE RIVERSIDE NARROWS

The extractions from the San Bernardino, Colton and Riverside Basin Areas for use within Western Municipal Water District (Western) on lands not tributary to the Riverside Narrows have been verified for the five-year base period ending in 1963.

The resulting five-year annual average was determined to be 42,535 acre-feet, as shown in Table No. 12 at page 37 of Chapter VII of the Annual Report of the Western-San Bernardino Watermaster for Calendar Year 1971. A detailed report on the verification for the five-year base period 1959-1963, and for ensuing years 1964-1970, is contained in the Report of Watermaster, Volume 6, dated June 1972.

The extractions from the above mentioned basin areas for the Calendar years 1971 through 2016, which were delivered within Western for use on lands not tributary to the Riverside Narrows, have been verified by the Watermaster as follows:

<u>YEAR</u>	<u>VERIFIED DELIVERIES</u> (Acre-feet)
<u>1959-63 Average</u>	<u>42,535</u>
1971	41,612
1972	40,314
1973	31,133
1974	35,020
1975	38,737
1976	42,922
1977	37,113
1978	34,988
1979	39,963
1980	41,458

This Volume 6 summarizes the total extractions and includes tables showing the detailed computations of the extractions by each entity. Table No. 8 was included in the original June 1972 Volume 6 for the period 1959-1968, but has been omitted and will not be included in future volumes.

Comments on issues addressed during Watermaster Verification:

During the preparation of the Calendar Year 2013 data, Table 6B was created. In December of 2013 Western Municipal Water District entered into a water lease agreement with the Riverside Highland Water Company. This table was created to document this water and with the knowledge that in years with large deliveries, some of this flow will be exported to areas Non-Tributary to the Riverside Narrows. This also necessitated additional lines to Table A.

On June 2013 during the work on Calendar Year 2011 data, the Watermaster modified several of the tables in the Annual Report. Table No. 14 was modified to include a line entitled "Additional New Export", which is defined as New Export that was allowed under the High Groundwater Mitigation agreements without replenishment. As a result, the deduction from New Export is now being made in Table No. 14. Therefore it is no longer necessary or appropriate to make the deduction in Volume 6, Table No. 1A, Column (15).

To accommodate this modification to the Annual Report, the amounts of additional extractions associated with the high groundwater mitigation have been deleted from Table No. 1A Column (15) and the column is labeled "Column Not Used". The results of this change are reflected as increases in amounts shown in Table No. 1A, Column (16) and the first and last lines of Table A.

During the 2011 verification, the Meeks & Daley (M&D) leased water was addressed. Table Nos. 1B and 6A were reworked to reflect the source of the water vs. place/type of delivery.

Rubidoux Community Services District submitted details of their service area in Chino Basin. With this new information, Table No. 10 figures were refined back to 1996.

During the 2010 verification, it was noted that several of the exports were not being properly accounted for.

Meeks & Daley leased water deliveries to Western (taken at the Jefferson Street Pump Station for the Non-Potable Distribution System) was not counted within M&D Export Table No. 6. The new Table No. 6A was added to record this export. Columns were included to account for future Western deliveries of leased M&D potable water at domestic interties.

It was also discovered that Riverside wholesale deliveries to Western (at Mockingbird Canyon and Warmington interties) and to Home Gardens County Water District were not included in Table No. 1A, Column 10 as previously assumed. Table No. 1B was added to account for this exported water. (White Gate/Green Orchard intertie is within the Riverside South Basin).

Lines were added to the summation Table A for the new export generated in Table Nos. 1B and 6A.

Rubidoux Community Services District started a wholesale connection to the Jurupa Community Services District in August of 2000. Table No. 10 was revised to include a new Column 6b to account for this wholesale export water.

Data from City of Riverside Records

Column (4) - Starting July 1, 1973, the City of Riverside took over operation of the Southwest Water Company (Meter Book area 15).

At the time water used in that area was reported directly in Acre Feet [See Table 1A, Column (4)].

In 1975 Meter Book Areas 17 and 18 were split off of Meter Book 15 and all three areas are now reported by number of active meters.

In 1977 Meter Book Areas 17 and 18 were recombined with Meter Book 15.

\* Corrected values

\*\* Starting in 1983, the City is able to generate an annual tabulation of water use in areas not tributary to the Riverside Narrows.

Columns (1) through (9) were estimated as follows: Using the factor Acre Feet per connection, obtained for the year 1965 for each Meter Book Area said duty use factors were adjusted for subsequent and preceeding years to compensate for consumptive variances, due to temperature and rainfall, by a ratio based on the ratio of total Annual System Production to Annual System Population for each year as compared to the same ratio for the year 1965.

Column (4) - Starting on July 1 1973, the City of Riverside took over operation of the Southwest Water Company (Meter Book Area 15).

At the time water use in that area was reported directly in acre feet.

Columns (6) and (7) - In 1975, Meter Book areas 17 and 18 were split off of Meter Book 15 and all three areas are now reported by number of active meters.

Column (10) = Total of Columns (1) through (9).

Column (12) = Total treated W.M.W.D. CRA water via WR-10 to the City of Riverside Filter Plant.

Column (13) = Column (12) x 2/3.

Column (14) = Total production from former Southwest Water Company Wells.

Column (15) = During the verification process for the 2011 reporting, the amounts of high groundwater mitigation additional extractions were deleted because such amounts were included in a modification of Table 14 in the Annual Report. Therefore the data in the column has been removed.

Column (16) = Column (10) minus Columns (11) (13) (14) and (15).

See notes on Table 1 about Meter Book number changes.

1994	11,787	1,761	61	13,609
1995	10,771	1,270	187	12,228

Column (5) = Column (1) + (2) + (3).

Base period table has Column (4) which is titled "2/3 of Weir No. 2 Chart & Calculated Flow" with a 5 yr average of 402 AF  
 Quantities in parentheses are negative values, net gain to the Canal from storm flow into Mockingbird Canyon Lake

Deliveries shown in Column (1) above are those made to the lands of shareholders in areas which  
 are not tributary to the Riverside Narrows.

\* Since the canal was converted to a pipeline from the headworks to about Weir No. 2 in 1975, the canal losses  
 in the Arlington Basin are assumed to equal 2/3 of the total loss. Previous to 1975, the losses  
 were assumed to occur equally along the entire canal, half above Weir No. 2 and half below.

Data is from the Gage Canal Company Records.

Export from the basin is the deliveries to the stockholder plus net increase storage in Mockingbird Lake is export  
 plus the losses that are also outside the basin.

Notes:

Column (3) = Column (1) x Column (2)  
 Column (5) = Column (3) + Column (4)  
 Column (6) = Column (5) x 40%

40% is the average of 2001-2011 RCSD wastewater to Riverside/RCSD consumption

Column 6a = from RSCD records - Column added during 2010 verification

Column 6a = Column 5 - Column 6

Column (6b) added during 2010 Verification

Column (6c) added during 2011 Verification

Column (7) = Column (5) - Column (6)

Column 7 = Column 6a + Column 6b + Column 6c

\* Area was served by Jurupa Hills Water Company prior to 1968.

- 1) During 2011 verification received new water service count
- 2) 0.85 AF/DU RCSD concurs is a reasonable use
- 3) Mobile Home Park uses estimated at 0.37 af/du \* 325 units for 1996-2009
- 4) Starting in 2008 from RCSD non-potable system account # 1502301000
- 5) Starting in 2010 report, actual metered water deliveries to the Park
- 6) Column 6c had not been included in totals, corrected during 2013 verification

SECTION II

CREDIT FOR RETURN FLOW  
RESULTING FROM DELIVERY OF IMPORTED WATER IN  
AREAS TRIBUTARY TO THE RIVERSIDE NARROWS

Pursuant to Judgment Paragraph XI(b)3 Western receives credit against any future replenishment obligations for any return flow from imported water used in Riverside County which contributes to base flow at Riverside Narrows. In addition, Judgment Paragraph XI(a) provides that the credit for return flow will be the calculated amount of return flow adjusted upward or downward depending on the quality (TDS) of the return flow, using the same quality adjustment formula used at Riverside Narrows in the Orange County Judgment.<sup>1</sup>

There are currently two methods of delivering imported water in Riverside County to areas tributary to Riverside Narrows.

- 1) Direct delivery to Western's retail service area and to the City of Riverside (WR-24C) of water from the Henry J. Mills Treatment Plant which treats State Water Project water.
  
- 2) Delivery to Western, or any Plaintiff party, of groundwater from the San Bernardino Basin Area pursuant to the 2004 Judgment Paragraph VI(b)6 Agreement that provides for 6000 AF of additional water extraction in exchange for Western's purchase of a like amount of recharge water.

Volume 6, Table No. 11, shows the return flow from imported water delivered by both Western and the City of Riverside to areas tributary to the Riverside Narrows for the calendar years 1971

through 2016. Water quality adjustments have been made in the table. The following information is intended to complement Table No. 11 data and help the reader understand its mechanics.

For calendar years 1971 through 1991, no source data is available. The only information available is the amounts indicated in Table No. 16 on the row titled *Return from Imported Water* published in the Western-San Bernardino Watermaster Annual Reports prior to April 1, 2014. This information is included at the bottom of Table No. 11 in the row titled *Quality Adjusted Return Flow Resulting from Imported Water Delivered to Areas Tributary to the Narrows*.

For all calendar years after 1991, the table row titled *Total Deliveries of Imported Water* lists the sum of all imported water delivered directly by Western and the City of Riverside, both to agricultural and domestic water users, within areas tributary to the Riverside Narrows (method 1 defined above). Pursuant to the 2004 Judgment Paragraph VI(b)6 Agreement that provides for additional water extractions in the San Bernardino Basin Area in exchange for Western's purchase of a like amount of imported recharge water, when applicable, *Imported Water Recharged in and Extracted from the San Bernardino Basin Area* is added to the *Total Deliveries of Imported Water*. (method 2 defined above). As of the writing of this report, such an extraction has occurred only once, in 2007, and is recorded in Table No. 11.

For calendar years after 1991, *Imported Water Return Flow Tributary to Narrows* is calculated as thirty-six (36) percent of *Total Deliveries of Imported Water* to areas tributary to the Riverside Narrows.

For all years for which supporting data for calculations are available (1992 through present), Western and the City of Riverside received direct delivery of imported water through Metropolitan Water District's Henry J. Mills Treatment Plant (Mills Plant) on Alessandro Boulevard in Riverside. The TDS levels at the Mills Plant are listed for each calendar year on the row titled *TDS of Delivered Water*

(mg/L). This information is used in the calculation to determine the *TDS of Return Flow from Delivered Water (mg/L)* and the *Amount of Adjustment Based on Quality of Imported Water*.

### **Calculating the TDS of Return Flow from Delivered Water**

For the purposes of calculating the *TDS of Return Flow from Delivered Water*, it is assumed that sixty-five (65) percent of *Total Deliveries of Imported Water* is applied to the land in areas tributary to the Riverside Narrows. 65 percent is considered reasonable by the Western-San Bernardino Watermaster based on analysis of actual customer water use in Western's retail water service area. To complete the determination of the concentration of salts in return flows to the Narrows, the ratio of *Total Deliveries of Imported Water* to *Imported Water Return Flow Tributary to Narrows* is multiplied by the *TDS of Delivered Water (mg/L)*.

The formula used is:

$$\text{Salt in Water Applied Outdoors} = \text{Salt in Return Flow}$$

$$\text{TDS of Return Flow from Delivered Water (mg/L)} =$$

$$\frac{(0.65 * \text{Total Deliveries of Imported Water} * \text{TDS of Delivered Water})}{\text{Imported Water Return Flow Tributary to Narrows}}$$

### **Calculating Amount of Adjustment Based on Quality of Imported Water**

The calculation of the *TDS of Return Flow from Delivered Water (mg/L)* can result in three scenarios:

1. TDS value greater than 700 mg/L;
2. TDS value greater than 600 mg/L but less than 700 mg/L; or,
3. TDS value less than 600 mg/L.

A TDS value greater than 700 mg/L, will result in a debit that is subtracted from the *Imported Water Return Flow Tributary to Narrows*. A TDS value greater than 600 mg/L but less than 700 mg/L will result in neither a credit being added to nor a debit being subtracted from the *Imported Water Return Flow Tributary to Narrows*. A TDS value less than 600 mg/L, will result in a credit that is added to the *Imported Water Return Flow Tributary to Narrows*.

The formula for the *Amount of Adjustment Based on Quality of Imported Water* is:

If the TDS is:	Then the <i>Quality Adjusted Return Flow Resulting from Imported Water Delivered to Areas Tributary to the Narrows</i> is determined by the formula <sup>1</sup> below
Greater than 700	$11 * \frac{\text{Imported Water Return Flow Tributary to Narrows} * (\text{TDS} - 700)}{15,250}$
600 to 700	$\text{Imported Water Return Flow Tributary to Narrows}$
Less Than 600	$11 * \frac{\text{Imported Water Return Flow Tributary to Narrows} * (600 - \text{TDS})}{15,250}$

The *Quality Adjusted Return Flow Resulting from Imported Water Delivered to Areas Tributary to the Narrows* is shown on the bottom line of Table No. 11.

1. Stipulated Judgment in the case of Orange County Water District v. City of Chino, et al., Case No. 117628-County of Orange, page 12.

Amount of Adjustment Based on Quality of Imported Water	10	-	-	-	-	-	-	-	-	-	-	
<b>Quality Adjusted Return Flow Resulting from Imported Water Delivered to Areas Tributary to the Narrows</b>	<b>11</b>	<b>331</b>	<b>345</b>	<b>305</b>	<b>346</b>	<b>330</b>	<b>358</b>	<b>331</b>	<b>255</b>	<b>302</b>	<b>398</b>	

- 1 Imported water delivered by Western to domestic customers in areas tributary to the Riverside Narrows.
- 2 Imported water delivered by Western to agricultural customers in areas tributary to the Riverside Narrows.
- 3 The sum of imported water delivered by Western in areas tributary to the Riverside Narrows.
- 4 Imported water purchased by the City of Riverside through MWD connection WR-24C and delivered to areas tributary to the Riverside Narrows.
- 5 Extraction of additional water by Western, or any Plaintiff, from the San Bernardino Basin Area made pursuant to any Judgment Paragraph VI (b) 6 Agreement that provides for extraction of additional water in exchange for Western's purchase of a like amount of imported recharge water.
- 6 The sum of all imported water deliveries to areas tributary to the Riverside Narrows.
- 7 36 percent of imported water delivered to areas tributary to the Riverside Narrows.
- 8 TDS in mg/L of State Water Project water from the Henry J Mills Treatment Plant. Prior to 1980, imported water was delivered from the Colorado River Aqueduct at Lake Mathews.
- 9 TDS (mg/L) of return flow from delivered water in areas tributary to the Riverside Narrows. TDS of return flow is greater than TDS of delivered water as a result of consumptive use.
- 10 Judgment Paragraph XI(a) provides for adjustments for water quality of imported water returned to areas tributary to the Riverside Narrows using the following formula from the Orange County Judgment:  $Adjustment = [11 * (Q/15250) * \Delta TDS]$ . In the case where the TDS of return flow is less than 600 mg/L, the quality adjustment results in a positive value. In cases where the TDS of return flow is greater than 700 mg/L, the quality adjustment results in a negative value. In cases where the TDS of return flow is greater than 600 and less than 700, no adjustment for water quality is required.
- 11 The quality adjusted return flow from delivery of imported water delivered by both Western and the City of Riverside in areas tributary to the Riverside Narrows. For calendar years 1971 through 1991, no data are available. The only information available is the amounts of Return from Imported Water published in the Western San-Bernardino Watermaster Annual Reports prior to April 1, 2014 (Table No. 16).

VOLUME 7-2016

INTRODUCTION

The settlement of the case of the Orange County Water District, Plaintiff, vs. City of Chino, et al., Defendants, being Case No. 117628 in the Superior Court of the State of California in and for the County of Orange, necessitated a settlement of the case of Western Municipal Water District, et al., Plaintiffs, vs. East San Bernardino County Water District, et al., Defendants, which was settled by Stipulated Judgment in Case No. 78426, entered in the Superior Court of the State of California in and for the County of Riverside, on April 17, 1969. Such Judgment was amended on February 28, 1992.

Paragraph X of the original Judgment, titled, "Replenishment to Offset New Exports of Water Not Tributary to the Riverside Narrows" recites as follows:

"Certain average annual amounts of water extracted from the San Bernardino Basin Area and the area downstream therefrom to Riverside Narrows during the five year period ending in 1963 have been exported for use outside the area tributary to Riverside Narrows ..."

"San Bernardino Valley shall be obligated to provide replenishment for any increase over the exports from San Bernardino Valley for use in any area not within Western nor tributary to Riverside Narrows as set forth in Table C-2 of Appendix "C", such amounts being subject to correction by the Watermaster ..."

Pursuant to the foregoing instructions, the Watermaster conducted an investigation of water produced within the San Bernardino Basin Area and Colton Basin Area within San Bernardino Valley and delivered to lands not within Western nor tributary to the Riverside Narrows. The results of this investigation which included the five-year base period 1959-1963 as well as the verified production for the Calendar Years 1970 and 1971 were embodied in Report of Watermaster, Volume 7 - Base Period 1959-1963 and 1970-1971, dated February, 1973.

During the verification of the extractions from the San Bernardino Basin Area and Colton Basin Area within San Bernardino Valley for the Calendar Year 1973, the amounts previously verified for the base period (calendar years) 1959-1963 were revised. The revised

verified amounts for the base period 1959-1963 are shown on Table A of this report in Section I, Chapter I. The verified amounts for calendar years 2012-2016 are shown on Table B of this volume in Section I, Chapter I. Procedures and basic data used in preparation of Tables A and B are contained in Section I, Chapters I and II, of this report.

In Section I, pursuant to the original Judgment, the combined New Export from both San Bernardino Basin Area and Colton Basin Area within San Bernardino Valley is determined. Under this approach, all New Export resulted in an obligation to replenish in the San Bernardino Basin Area even though some of the exported extractions were from the Colton Basin Area within San Bernardino Valley. Another approach was developed in 2013 to address this matter and partially implement the 1992 Amendment.

The 1992 Amendment included several changes that affect the methods that Watermaster uses to account for New Export. First, the second reference to San Bernardino Valley in the second quotation above was changed to San Bernardino Basin Area and new provisions for the Colton Basin Area within San Bernardino Valley and Riverside Basin Area within San Bernardino County were added later in the paragraph. Replenishment obligations for San Bernardino Valley pursuant to the 1992 amended Paragraph X are as follows:

"... San Bernardino Valley shall be obligated to provide replenishment for any increase over the exports from the San Bernardino Basin Area for use in any area not within Western nor tributary to Riverside Narrows as set forth in Table C-2 of Appendix "C", such amounts being subject to correction by the Watermaster, or for any exports from the San Bernardino Basin Area for use in the Yucaipa, San Timoteo, Oak Glen and Beaumont Basins. San Bernardino Valley shall also be obligated to provide replenishment in the Colton or Riverside Basin, as the case may be, to offset loss of return flow related to any increase over the exports therefrom within San Bernardino Valley for use in any area not within Western nor tributary to Riverside Narrows as set forth in Table C-2 of Appendix "C", such amounts being subject to correction by the Watermaster. Against its replenishment obligation to offset loss of return flow related to any increase in the exports from the Colton Basin Area or Riverside Basin Area within San Bernardino Valley, San Bernardino Valley shall receive credit for that portion of direct delivered water which originated outside that Basin and which returns to the ground water

of that Basin." (underline indicates changes and additions to the original Judgment.)

Pursuant to the 1992 Amendment, Section II provides data which allows determination of only the New Export from the San Bernardino Basin Area to the Chino Basin in Table No. 15A of the Annual Report. Such determination is accomplished by using the data developed in Section I along with data in other data volumes.

The verified amounts exported from only the San Bernardino Basin Area to the Chino Basin for the base period 1959-1963 are shown in Table C of this report. The verified amounts for calendar years 2012-2016 are shown in Table D of this report.

Procedures and basic data used in preparation of Tables C and D are contained in Section II, Chapter III, of this report.

The 1992 Amendment included new provisions related to accounting for the export to Chino Basin of extractions from the Colton and Riverside Basins. Such provisions require a determination of the credit in those Basins resulting from the delivery of extractions from the San Bernardino Basin Area. The specific language in Paragraph X of the amended Judgment requiring these determinations is:

"... San Bernardino Valley shall receive credit for that portion of direct delivered water which originated outside that Basin (Colton Basin Area within San Bernardino Valley or Riverside Basin Area within San Bernardino County) and which returns to the ground water of that Basin (Colton Basin Area within San Bernardino Valley or Riverside Basin Area within San Bernardino County)." (emphasis and parenthetical note added)

This Amendment provides that San Bernardino Valley will receive credit against any obligations in the Colton Basin Area within San Bernardino Valley and Riverside Basin Area within San Bernardino County for the return flow resulting from the delivery to such Basin Areas of extractions that originate outside the Basins. Such deliveries from the San Bernardino Basin Area to the Colton Basin Area within San Bernardino Valley and Riverside Basin Area within San Bernardino County are accounted for in Section III. Such accounting was performed to eventually be able to credit San Bernardino Valley obligations in the Colton Basin Area within San Bernardino Valley and Riverside Basin Area within San Bernardino County as required by the Amendment and to maintain

hydrologic integrity in the San Bernardino Basin Area as referenced in Watermaster documents that supported the 1992 Amendment. Hydrologic integrity of the San Bernardino Basin Area is maintained by excluding from determinations of credits and obligations the return flow resulting from Basin extractions that are used anywhere outside the Basin. Any increase in deliveries of San Bernardino Basin Area extractions, relative to the base period, to the Colton Basin Area within San Bernardino Valley and Riverside Basin Area within San Bernardino County is now referred to as New Deliveries.

Section III provides data which allows determination of New Deliveries from the San Bernardino Basin Area for use on lands within the Colton Basin Area within San Bernardino Valley and Riverside Basin Area within San Bernardino County utilizing the data developed in Section II along with data in other data volumes.

The verified extractions from the San Bernardino Basin Area delivered for use on lands within the Colton Basin Area within San Bernardino Valley and Riverside Basin Area within San Bernardino County for the base period 1959-1963 are shown in Table E of this report. The verified amounts for calendar years 2012-2016 are shown in Table F of this report.

Procedures and basic data used in preparation of Tables E and F are contained in Section III, Chapter IV, of this report.

Section IV provides data which allows determination of Loss of Return Flow from the Colton Basin Area within San Bernardino Valley and Riverside Basin Area within San Bernardino County utilizing data developed in prior sections and other Volumes of the Annual Report.

Determination of Increased Return Flow to the Colton Basin Area within San Bernardino Valley and Riverside Basin Area within San Bernardino County utilizing data developed in prior sections and other Volumes of the Annual Report is also made.

Section V verifies deliveries of State Water Project water to San Bernardino Valley by type and place of use.

The verified amounts of State Water Project water delivered within the San Bernardino Basin Area and its uses are shown in Chapter V of this report in Table Nos. 21 and 22.

VOLUME 7-2016

SECTION I

COMBINED EXPORTS FROM THE SAN BERNARDINO BASIN AREA AND COLTON  
BASIN AREA WITHIN SAN BERNARDINO VALLEY FOR USE ON LANDS NOT  
WITHIN WESTERN NOR TRIBUTARY TO THE RIVERSIDE NARROWS

CHAPTER I

DELIVERIES TO CHINO BASIN

The verified amounts set forth in this Chapter pertain solely to those extractions from the San Bernardino Basin Area and Colton Basin Area within San Bernardino Valley for use on lands situated within the Chino Basin.

The entities delivering water to this area include Fontana Union Water Company, West Valley Water District and the City of Rialto. Maps Nos. 1, 2 and 3 included herein delineate the boundaries of the three agencies respectively, and also show the lands within each agency which are not within Western nor tributary to the Riverside Narrows. For purposes of this determination such lands are considered as lying northerly of the groundwater divide separating the Riverside and Chino Basins and westerly of the Rialto-Colton Fault. The verified amounts for the base period 1959-1963 are shown in Table A of this report. The verified amounts for calendar years 2012-2016 are shown in Table B.

Deliveries to these areas within each agency have been determined as follows:

## FONTANA UNION WATER COMPANY

The lands served by the Fontana Union Water Company which include the San Gabriel Valley Water Company and which are not within Western nor tributary to the Riverside Narrows are shown on Map No. 1. The location of wells and surface diversion facilities which produce water delivered to said lands are also shown.

The total production from the San Bernardino Basin Area and Colton Basin Area within San Bernardino Valley available for use on the nontributary lands have been determined by the sum of the following:

1. Production from Fontana Union Water Company wells situated within the San Bernardino Basin Area and Colton Basin Area within San Bernardino Valley as reported and verified in Recordation Filings with the Watermaster with the exception that two wells situated on the Lytle Creek stream channel at Miller Narrows deliver water into the Lytle Creek powerhouse penstock. This water has been commingled with surface production.
2. Deliveries to Fontana Union Water Company's "Breedline" measured at the Fontana Powerhouse forebay Weir No. 4 and adjusted for deliveries to the Breedline from Fontana Union Water Company Well No. 27.
3. Deliveries to the Fontana Union Water Company measured at their 20 foot weir diverting from the Fontana Powerhouse afterbay plus diversions from the afterbay for delivery to City of Rialto and Owl Service Rock Company.

The Item 3 deliveries to Fontana Union Water Company reckoned at the Fontana Powerhouse 20' Weir were measured by Fontana Union Water Company and the United States Geological Survey. Since United States Geological Survey measurements were based on data obtained by continuous stage recorder as opposed to instantaneous measurements by Fontana Union Water Company two to three times daily, the United States Geological Survey data were used for purposes of the determinations contained in this report. In addition to surface diversions from Lytle Creek, the United States Geological Survey data also include an undetermined amount of water produced by the Miller Narrows Wells and may from time to time

also include water obtained by temporary arrangements with other agencies diverting from the Fontana Powerhouse afterbay. For these reasons the amounts used by the Watermaster are for purposes of this report only (i.e. deliveries to Chino Basin) and are not to be construed as a Watermaster verification of the total production by Fontana Union Water Company from either San Bernardino Basin Area or Colton Basin Area within San Bernardino Valley.

In order to determine the net deliveries to the nontributary area (Chino Basin) the total was adjusted for deliveries to tributary areas as follows:

1. Deliveries to the City of San Bernardino from Fontana Union Water Company Well No. 1, reported by Fontana Union Water Company as total production of this well.
2. Water delivered to the Owl Service Rock Company and its successor Cemex located within the San Bernardino Basin Area as reported by Fontana Union Water Company and Cemex.
3. Water delivered for use on citrus groves situated within the Colton Basin Area within San Bernardino Valley as reported by Fontana Union Water Company.
4. Water delivered to City of Rialto through West Valley Water District diversion facilities at Fontana Powerhouse afterbay.

The components of production and delivery by the Fontana Union Water Company for the base period 1959-1963 and calendar years 2012-2016, together with the indicated deliveries to Chino Basin, are summarized in Table No. 1.

- (12) Difference of Column (6) minus Column (11).

Note: Table No. 1 revised during the 1973 verification.

## WEST VALLEY WATER DISTRICT

The lands served by the West Valley Water District which are not within Western nor tributary to the Riverside Narrows are delineated on Map No. 2. Water delivered to said area was obtained from wells located within the San Bernardino Basin Area and Colton Basin Area within San Bernardino Valley and surface diversions from Lytle Creek. In addition these lands also received water extracted from wells within the Chino Basin.

The total deliveries to the nontributary area (Chino Basin) were based on the actual metered deliveries obtained from the records of the West Valley Water District. Since a portion of this water was supplied by wells located within the nontributary area, the total deliveries were reduced by the amount supplied by said wells. West Valley Water District reports that the production from these wells is used wholly within the Chino Basin. Subsequent to the base period 1959-1963, West Valley Water District records also include the Domestic and Commercial deliveries as determined from the meter books covering the nontributary area. These metered areas are also shown on Map No. 2.

During the verification of extractions for calendar year 2015, West Valley Water District representatives reported that the method that has been used for determination of the amount of water that West Valley Water District delivered in the Chino Basin Area was not accurate. West Valley Water District representatives reviewed the records of deliveries that had been provided in prior years. West Valley Water District then provided revised determinations of the amounts of that West Valley Water District delivered to lands within Chino Basin for the calendar years 2008 through 2014 together with the amount for calendar year 2015. The revised amounts for calendar years 2011 through 2014 were included in the determinations in Volume 7 for the calendar year 2015. The corrected determinations for calendar years 2008 through 2010 and for calendar years 2011 through 2014 may be found in the appendices volume to the Annual Report of the Watermaster for calendar year 2016.

During Calendar year 2016, Marygold Mutual Water Company requested supplemental water from San Bernardino Valley to meet the needs of the shareholders within its service area. Marygold Mutual Water Company is bounded by San Bernardino Avenue, Cedar Avenue, Interstate 10, and Sierra Avenue in Chino Basin area within San Bernardino Valley. San Bernardino Valley agreed to provide supplemental State Water Project water for use in Marygold Mutual Water Company's service area. The agreement provides for Marygold

Mutual Water Company to purchase State Water Project water that is treated at West Valley Water District's Oliver P. Roemer Water Treatment Plant. The treated water is then conveyed through the West Valley Water District's distribution system to an existing connection for delivery to Marygold Mutual Water Company's distribution system. Marygold Mutual Water Company purchased and received 726.78 acre feet of State Water Project water during Calendar year 2016. This Volume 7 on Table No. 2 contains the adjustment of the amounts of deliveries of water by West Valley Water District in Chino Basin illustrating the delivery of supplemental, State Water Project water to Marygold Mutual Water Company. Table No. 21 of this Volume 7 includes the amounts of water delivered to Marygold Mutual Water Company in the column titled: *Direct Deliveries Outside San Bernardino Basin Area.*

The annual deliveries to nontributary areas by the West Valley Water District for the base period 1959-1963 and calendar years 2012-2016 are summarized in Table No. 2.

Column Explanation:

- (2) Amount includes production of Wells Rec. Nos. 3600379, 3600380 & 3601005. Between 2003-2011, using Chino Basin Watermaster Annual Report, Appendix J. Starting with the CY 2012 report, data was provided by West Valley Water District.
- (2a) Amount of Supplemental Water purchased by and delivered to Marygold Mutual Water Company through West Valley Water District facilities. Data provided by San Bernardino Valley Municipal Water District
- (2b) Amount includes production of Wells Rec. 3600379, 3600380, 3601005, 3603757 & 3603772.
- (3) So. Calif. Water Co. Well Rec. No. 3600379 purchased by W.S.B.C.W.D. in 1970. Has been destroyed
- (4) So. Calif. Water Co. Well Rec. No. 3600380 purchased by W.S.B.C.W.D. in 1970. Has been destroyed
- (5) Former Citizens Land & Water Co. merged in 1962 to form W.S.B.C.W.D. Presently a monitoring well
- (5a) West Valley Water District Well No. 37 Rec. No. 3603757 located in Chino Basin.
- (5b) West Valley Water District Well No. 42 Rec. No. 3603772 located in Chino Basin.
- (6) Column (3) + (4) + (5) + (5a) + (5b).
- (7) Column (2) minus (6). Deliveries in Chino Basin from production in San Bernardino Basin and Colton Basin Area.

\* West San Bernardino County Water District (WSBCWD) now West Valley Water District.

CITY OF RIALTO

The lands served by the City of Rialto which are not within Western nor tributary to the Riverside Narrows are delineated on Map No. 3. Water delivered to the City was produced from wells within the San Bernardino Basin Area and Colton Basin Area within San Bernardino Valley and surface diversions from Lytle Creek. In addition the City also receives water extracted from a well within the Chino Basin.

The production records and records of water purchased together with records of metered customer deliveries are furnished by the City of Rialto.

The total water production delivered into the City's system has been determined as follows:

1. Production from City of Rialto wells situated within the San Bernardino Basin Area and Colton Basin Area within San Bernardino Valley as reported in Recordation Filings with the Watermaster and verified from records furnished by the City.
2. Surface water diverted at Fontana Powerhouse afterbay and delivered to City of Rialto determined from City Records.
3. Water purchased by City of Rialto as determined from City Records.
4. Water produced in Chino Basin and delivered into City's system from Recordation Filing to the Watermaster and City of Rialto records. Such water is produced from Well Recordation No. 3602270 and during the base period 1959-1963 was used solely for agricultural purposes in the Chino Basin. From 1966 to date this well delivered water into the City's domestic system and is considered to be used wholly within the Chino Basin.

Based on metered deliveries it was determined that the percentage of total production delivered to Chino Basin was about 18 percent as compared to the 28 percent used during the initial verification. The total production delivered to Chino Basin during the base period 1959-1963 was revised accordingly, and beginning in 1971 the actual metered deliveries were used. The amount delivered to the Chino Basin was reduced by the total verified production within

Chino Basin as set forth in Item (4) above, assuming that such production was used entirely within the Chino Basin as reported by the City. The remaining amount was considered representative of the total production from the San Bernardino Basin Area and Colton Basin Area within San Bernardino Valley exported to the Chino Basin by the City of Rialto.

Since the sewage effluent from the City Sewage Treatment Plant accrues to the Santa Ana River above the Riverside Narrows, the total exports were adjusted to reflect this return flow. Such adjustment was based on a percentage estimated at 32 percent for the year 1959 and increasing on a straight line basis to 40 percent in 1963. This assumption was predicated on the date of construction of the treatment plant and the gradual conversion of individual septic tanks and cesspools to the sewage system.

Analysis of the production and sewage plant effluent discharge data indicates an average effluent discharge from water exported to Chino Basin of about 39 percent for the calendar year 2001. This amount is weighted to account for the domestic, agricultural and industrial deliveries through the City's domestic system and the difference in sewage return flow accruing from such uses.

In May of 2009, these calculations were revisited. A detailed review of water sales records was made and production was calculated by water use types in each of the overlying meter book areas, with adjustments made to follow the defined Chino Basin boundaries. A review of March 2005 water use (above normal rainfall period) was used to determine indoor/sewered flow vs. outdoor use. These numbers appear on Table 3, columns (9) and (12).

The annual deliveries to nontributary areas for the base period 1959-1963 and calendar years 2012-2016 are summarized in Table No. 3.

Column explanation:

- (2) Verified extractions, Volume 1 Report of Watermaster. Excludes Lytle Creek Diversion Recordation No. 3601718. Includes only those wells that were owned and operated by City of Rialto in any year. For the years 1959 through 1963 includes well Recordation Nos. 3601263 and 3602080. For subsequent years, includes wells that City of Rialto acquired in the year acquired and following years.
- (3) Metered inflow to City of Rialto Filter Plant City of Rialto Records, which includes water delivered under stock entitlement that City of Rialto owns in West Valley Water District and purchases from Fontana Union Water Co. (Rialto Filter Plant 3601718)
- (4) Verified extractions, Volume 2, Report of Watermaster. Includes production of Wells Recordation Nos. 3602269 & 3602271 after acquisition by City of Rialto.
- (5) City of Rialto Records of Purchases. Purchases from SBVMWD Baseline Feeder commencing 1990.
- (6) Sum Columns (2) + (3) + (4) + (5).
- (7) Well Recordation No. 3602270 acquired by City of Rialto in 1966 and wells constructed by City of Rialto (3603175 & 3603537)
- (8) Sum Columns (6) + (7).
- (9) Metered deliveries in Chino Basin from City of Rialto Billing Records beginning 1971. Base period years revised during 1973 verification to reflect 18% average distribution of metered deliveries by City of Rialto records for years 1971 through 1974.
- (10) Same as Column (7).
- (11) Difference Column (9) minus Column (10).
- (12) Assumed for Base Period. 1971 to date estimated weighted average return flow percentage based on: 1) metered agricultural and park deliveries with no return flow, 2) metered residential deliveries at 40 percent return flow, and 3) metered industrial deliveries (Phototron Company) at 90 percent return flow. In May 2009 a detailed study was completed which is described in text on previous page.
- (13) Product Column (11) times Column (12).
- (14) Difference Column (11) minus Column (13) net export of water produced in San Bernardino & Colton Basin Areas to Chino Basin.

Note: Table No. 3 revised during the 1973 verification.  
 In May 2009 a detail calculation of water delivery and return was completed using data from Rialto's water meter books by Steve Mains Columns 9 and 12 data was adjusted for 2004, 2005, and 2006

VOLUME 7-2016

CHAPTER II

DELIVERIES TO AREAS OTHER THAN CHINO BASIN

Paragraph X of the Judgment also provides for replenishment by San Bernardino Valley to the extent exports are made from the San Bernardino Basin Area for use in the Yucaipa, San Timoteo, Oak Glen and Beaumont Basins.

The results of the initial verification of production from the San Bernardino Basin Area indicated that such exports were not made during the base period 1959-1963 nor prior to calendar year 1979.

During 1978 San Bernardino Valley constructed the Mill Creek Pipeline to convey water from the Southern California Edison Company Mill Creek #2/#3 Powerhouse afterbay to the Yucaipa Regional Park. As shown on Table 4, the pipeline was used extensively.

During 1987 San Bernardino Valley Municipal Water District completed construction of the "Yucaipa Pipeline" which conveys Mill Creek waters from the San Bernardino Basin Area to the Yucaipa Basin. Yucaipa Regional Park receives Mill Creek water which is used for maintenance of the reservoir levels, irrigation of the Park and limited spreading for recharge of the Yucaipa Groundwater Basin. Mill Creek water is also delivered into Wilson Creek Spreading Basins for recharge into Yucaipa Groundwater Basin. The location of the Yucaipa Pipeline, Yucaipa Regional Park, and Wilson Creek Spreading Basins are shown on Map No. 4 which is included herein.

During 2003 the State of California Department of Water Resources completed the East Branch Extension Phase I project. This project included facilities to provide delivery of State Water Project water to Yucaipa Valley within San Bernardino Valley and to the San Geronio Pass Water Agency. Since completion of the East Branch Extension Phase I project State Water Project water has been delivered to the Yucaipa, San Timoteo, Oak Glen and Beaumont Basins.

During calendar year 2008, San Bernardino Valley Municipal Water District completed construction of portions of its Central Feeder Groundwater Banking/Conjunctive Use Project. The initial portions of the Central Feeder included the Redlands Pump Station, several

miles of the Central Feeder Pipeline and a connection to The Metropolitan Water District of Southern California Inland Feeder Project. The Central Feeder Project has many uses including high groundwater mitigation, distribution of water throughout the San Bernardino Basin Area and the San Bernardino Valley in addition to its groundwater banking and conjunctive use concepts. During calendar year 2008, testing of the project included pumping 102 acre feet of water that had been extracted from wells in the San Bernardino Basin Area into The Metropolitan Water District of Southern California Inland Feeder Project. The water that was pumped to test the Central Feeder project facilities was delivered into Inland Feeder Project and for the most part was conveyed through the Inland Feeder Project to Diamond Valley Reservoir. In this instance, the 102 acre feet of test water pumped in 2008, the ultimate fate of the water pumped was not prescribed. The Metropolitan Water District of Southern California distributed the water at its discretion. Under the terms of this Judgment and the previously described circumstances, the 102 acre feet of water used to test the facilities should be considered as having been delivered to areas "... not within Western nor tributary to the Riverside Narrows..." Accordingly, the 102 acre foot amount has been shown in Table No. 4.

SECTION II

EXPORTS FROM THE SAN BERNARDINO BASIN AREA FOR USE ON  
LANDS NOT WITHIN WESTERN NOR TRIBUTARY TO THE  
RIVERSIDE NARROWS

CHAPTER III

DELIVERIES TO CHINO BASIN FROM THE SAN BERNARDINO BASIN AREA

In Section II the deliveries to Chino Basin from the San Bernardino Basin Area are determined.

The verified amounts for the base period 1959-1963 are shown in Table C of this report. The verified amounts for calendar years 2012-2016 are shown in Table D. These amounts were determined using data from Section I along with data from other data volumes. Fontana Union Water Company, West Valley Water District and City of Rialto deliver water to areas within Chino Basin. For Fontana Union Water Company, adequate data is contained in Table No. 1 to determine the quantities of water exported from the San Bernardino Basin Area to Chino Basin during the base period 1959-1963 and for calendar year 1971 to present. West Valley Water District has sources of supply from the San Bernardino Basin Area, Colton Basin Area within San Bernardino Valley, Riverside Basin Area within San Bernardino County, and State Water Project water which is treated at the Oliver P. Roemer Water Filtration Facility. A pro-rata share of West Valley Water District's total supply was determined to be produced in the San Bernardino Basin Area and delivered to the Chino Basin. City of Rialto has sources of supply from the San Bernardino Basin Area, Colton Basin Area within San Bernardino Valley, Riverside Basin Area within San Bernardino County, and State Water Project water. The City has also historically purchased water from others prior to availability of water from the San Bernardino Valley Municipal Water District's Baseline Feeder whose source of water is in the San Bernardino Basin Area. A pro-rata share of City of Rialto's total supply was determined to be produced in the San Bernardino Basin Area and delivered to the Chino Basin. Details of individual agency calculations are discussed in the following portions of the report and are shown on Table Nos. 5, 6 and 7. The verified amounts for the base period 1959-1963 are shown in Table C of this report. The verified amounts for calendar years 2012-2016 are shown in Table D.

\* Total Agency supplies were prorated to determine percentage of total supply from the San Bernardino Basin Area, Colton Basin Area within San Bernardino Valley and Riverside Basin Area within San Bernardino County. The San Bernardino Basin Area percentage was then applied to total export to Areas Not Within Western nor Tributary to Riverside Narrows (See Table B).

\*\* Includes deliveries from Baseline Feeder.

FONTANA UNION WATER COMPANY

During the base period 1959-1963 Fontana Union Water Company produced water from the San Bernardino Basin Area and the Colton Basin Area within San Bernardino Valley. Using data from Table No. 1, Table No. 5 shows extractions from the San Bernardino Basin Area and Colton Basin Area within San Bernardino Valley during the base period 1959-1963. It also shows deliveries made in the San Bernardino Basin Area and Colton Basin Area within San Bernardino Valley. Using these data, an average annual quantity of water exported from the San Bernardino Basin Area to the Chino Basin was determined for the base period 1959-1963.

Using data from Table No. 1, Table No. 5 also shows extractions from the San Bernardino Basin Area and Colton Basin Area within San Bernardino Valley during calendar years 2012-2016. It also shows deliveries made in the San Bernardino Basin Area and Colton Basin Area within San Bernardino Valley (to the extent such information is provided by Fontana Union Water Company). Using these data, an average annual quantity of water exported from the San Bernardino Basin Area to the Chino Basin was determined for calendar years 2012-2016.

\* Fontana Water Company delivers water extracted from San Bernardino Basin Area and Colton Basin Area as Fontana Union Water Company. The Fontana Water Company water service area is located largely within Chino Basin. However, portions of the Fontana Water Company service area are within Colton Basin Area. Records of the deliveries within the Colton Basin Area were recently provided to the Watermaster and will be incorporated in the Watermaster report for calendar year 2017.

## WEST VALLEY WATER DISTRICT

During the base period 1959-1963 West Valley Water District produced water from the San Bernardino Basin Area, the Colton Basin Area within San Bernardino Valley and the Riverside Basin Area within San Bernardino County for export to Chino Basin. Table No. 6 shows Total Extractions/Supply from the San Bernardino Basin Area, the Colton Basin Area within San Bernardino Valley and the Riverside Basin Area within San Bernardino County during the base period 1959-1963. From these values, the percentage of West Valley Water District's water produced from the San Bernardino Basin Area was determined. That percentage was applied to the total West Valley Water District deliveries to the Chino Basin to determine the pro-rata share of San Bernardino Basin Area water delivered to the Chino Basin for each year. An average annual quantity was determined for the base period 1959-1963.

Table No. 6 also shows Total Extractions/Supply from the San Bernardino Basin Area, the Colton Basin Area within San Bernardino Valley, the Riverside Basin Area within San Bernardino County, and State Water Project water during calendar years 2012-2016. From these values, the percentage of West Valley Water District's water produced from the San Bernardino Basin Area was determined for each year. That percentage was applied to the total West Valley Water District deliveries to the Chino Basin to determine the pro-rata share of San Bernardino Basin Area water delivered to the Chino Basin in each year. An average annual quantity was determined for calendar years 2012-2016.

During the verification of extractions for calendar year 2016, West Valley Water District representatives reported that the method that has been used for determination of the amount of water that West Valley Water District delivered in the Chino Basin Area was not accurate. West Valley Water District representatives reviewed the records of deliveries that had been provided in prior years. West Valley Water District then provided revised determinations of the amounts of that West Valley Water District delivered to lands within Chino Basin for the calendar years 2008 through 2014 together with the amount for calendar year 2015. The revised amounts for calendar years 2011 through 2014 were included in the determinations in Volume 7 for the calendar year 2015. The corrected determinations for calendar years 2008 through 2010 and for calendar years 2011 through 2014 may be found in the Appendix B of the Appendices volume of the Annual Report of the Watermaster for calendar year 2016.

(1) Verified extractions, Volume 3 Report of Watermaster. Includes only those wells that were owned and operated by West Valley Water District in any year. For the years 1959 through 1963, includes well Recordation Numbers; 3601004, 3601434, 3601683 and 3601763. For subsequent years includes wells that West Valley Water District acquired in the year acquired and following years.

CITY OF RIALTO

During the base period 1959-1963 City of Rialto produced water from the San Bernardino Basin Area and the Colton Basin Area within San Bernardino Valley for export to Chino Basin. Table No. 7 shows Total Extractions/Supply from the San Bernardino Basin Area, Colton Basin Area within San Bernardino Valley, Riverside Basin Area within San Bernardino County and State Water Project water during the base period 1959-1963. From these values, the percentage of City of Rialto's water produced from the San Bernardino Basin Area was determined. That percentage was applied to the total City of Rialto deliveries to the Chino Basin to determine the pro-rata share of San Bernardino Basin Area water delivered to the Chino Basin for each year. An average annual quantity was determined for the base period 1959-1963.

Table No. 7 also shows Total Extractions/Supply from the San Bernardino Basin Area, Colton Basin Area within San Bernardino Valley, Riverside Basin Area within San Bernardino County, and State Water Project water during calendar years 2012-2016. From these values, the percentage of City of Rialto's water produced from the San Bernardino Basin Area was determined for each year. That percentage was applied to the total City of Rialto deliveries to the Chino Basin to determine the pro-rata share of San Bernardino Basin Area water delivered to the Chino Basin in each year. An average annual quantity was determined for calendar years 2012-2016.

FONTANA UNION WATER COMPANY

During the base period 1959-1963 Fontana Union Water Company produced water from the San Bernardino Basin Area and the Colton Basin Area within San Bernardino Valley. Using data from Table No. 1, Table No. 8 shows extractions from the San Bernardino Basin Area and Colton Basin Area within San Bernardino Valley during the base period 1959-1963. It also shows deliveries made in the San Bernardino Basin Area and Colton Basin Area within San Bernardino Valley. Using these data, an average annual quantity of water from the San Bernardino Basin Area delivered for use on lands within the Colton Basin Area within San Bernardino Valley and Riverside Basin Area within San Bernardino County was determined for the base period 1959-1963.

Using data from Table No. 1, Table No. 8 also shows extractions from the San Bernardino Basin Area and Colton Basin Area within San Bernardino Valley during calendar years 2012-2016. It also shows deliveries made in the San Bernardino Basin Area and Colton Basin Area within San Bernardino Valley (to the extent such information is provided by Fontana Union Water Company). Using these data, an average annual quantity of water from the San Bernardino Basin Area delivered for use on lands within the Colton Basin Area within San Bernardino Valley and Riverside Basin Area within San Bernardino County was determined for calendar years 2012-2016.

\*Fontana Water Company delivers water extracted from San Bernardino Basin Area and Colton Basin Area as Fontana Union Water Company. The Fontana Water Company water service area is located largely within Chino Basin. However, portions of the Fontana Water Company service area are within Colton Basin Area. Records of the deliveries within the Colton Basin Area are not available to the Wesern-San Bernardino Watermaster.

## WEST VALLEY WATER DISTRICT

During the base period 1959-1963 West Valley Water District produced water from the San Bernardino Basin Area for use in the San Bernardino Basin Area and for use on lands in the Colton Basin Area within San Bernardino Valley and Riverside Basin Area within San Bernardino County. A portion of the San Bernardino Basin Area production was used within the San Bernardino Basin Area. Table No. 9 shows Total Extractions from the San Bernardino Basin Area, deliveries in the San Bernardino Basin Area, and deliveries to Chino Basin from Table No. 6 during the base period 1959-1963. From these values, West Valley Water District's deliveries for use on lands within the Colton Basin Area within San Bernardino Valley and Riverside Basin Area within San Bernardino County were determined for each year. An average annual quantity was determined for the base period 1959-1963.

Table No. 9 also shows Total Extractions from the San Bernardino Basin Area, deliveries in the San Bernardino Basin Area, and deliveries to Chino Basin from Table No. 6 during calendar years 2012-2016. From these values, West Valley Water District's deliveries for use on lands within the Colton Basin Area within San Bernardino Valley and Riverside Basin Area within San Bernardino County were determined for each year. An average annual quantity was determined for calendar years 2012-2016.

During the verification of extractions for calendar year 2015, West Valley Water District representatives reported that the method that has been used for determination of the amount of water that West Valley Water District delivered in the Chino Basin Area was not accurate. West Valley Water District representatives reviewed the records of deliveries that had been provided in prior years. West Valley Water District then provided revised determinations of the amounts of that West Valley Water District delivered to lands within Chino Basin for the calendar years 2008 through 2014 together with the amount for calendar year 2015. The revised amounts for calendar years 2011 through 2014 were included in the determinations in Volume 7 for the calendar year 2015. The corrected determinations for calendar years 2008 through 2010 and for calendar years 2011 through 2014 may be found in the Appendix B of the Appendices volume of the Annual Report of the Watermaster for calendar year 2016.

CITY OF RIALTO

During the base period 1959-1963 City of Rialto produced water from the San Bernardino Basin Area for use on lands in the Colton Basin Area within San Bernardino Valley and Riverside Basin Area within San Bernardino County. Table No. 10 shows Total Extractions from the San Bernardino Basin Area and deliveries to Chino Basin from Table No. 7 during the base period 1959-1963. From these values, City of Rialto's deliveries for use on lands within the Colton Basin Area within San Bernardino Valley and Riverside Basin Area within San Bernardino County were determined for each year. An average annual quantity was determined for the base period 1959-1963.

Table No. 10 also shows Total Extractions from the San Bernardino Basin Area and deliveries to Chino Basin from Table No. 7 during calendar years 2012-2016. From these values, City of Rialto's deliveries for use on lands within the Colton Basin Area within San Bernardino Valley and Riverside Basin Area within San Bernardino County were determined for each year. An average annual quantity was determined for calendar years 2012-2016.

CITY OF COLTON

During the base period 1959-1963 City of Colton produced water from the San Bernardino Basin Area for use on lands in the Colton Basin Area within San Bernardino Valley and Riverside Basin Area within San Bernardino County. Table No. 11 shows Total Extractions from the San Bernardino Basin Area by City of Colton. An average annual quantity was determined for the base period 1959-1963.

Table No. 11 also shows Total Extractions from the San Bernardino Basin Area by City of Colton during calendar years 2012-2016. City of Colton's extractions from the San Bernardino Basin Area were determined to have been delivered for use on lands within the Colton Basin Area within San Bernardino Valley and Riverside Basin Area within San Bernardino County during each year. An average annual quantity was determined for calendar years 2012-2016.

CHAPTER V

INCREASED DELIVERIES FROM THE COLTON BASIN AREA WITHIN SAN  
BERNARDINO VALLEY FOR USE ON LANDS NOT WITHIN WESTERN NOR  
TRIBUTARY TO THE RIVERSIDE NARROWS, AND LOSS OF RETURN FLOW  
RELATED TO SUCH INCREASED DELIVERIES

In Chapter V the increased deliveries from Colton Basin Area within San Bernardino Valley for use on lands not within Western nor Tributary to the Riverside Narrows and resulting loss of return flow from Colton Basin Area within San Bernardino Valley are determined.

The verified amounts for the base period 1959-1963 are shown in Table G of this report. The verified amounts for calendar years 2012-2016 are shown in Table H. These amounts were determined using data as detailed in the notes on the subsidiary tables.

FONTANA UNION WATER COMPANY

During the base period 1959-1963 Fontana Union Water Company produced water from the Colton Basin Area within San Bernardino Valley. Using data from Table No. 1, Table No. 14 shows extractions from the Colton Basin Area within San Bernardino Valley during the base period 1959-1963. It also shows deliveries for use on lands not within Western nor tributary to the Riverside Narrows. Using these data, an average annual quantity of water from the Colton Basin Area within San Bernardino Valley and delivered for use on lands not within Western nor tributary to the Riverside Narrows was determined for the base period 1959-1963.

Using data from Table No. 1, Table No. 14 also shows extractions from the Colton Basin Area within San Bernardino Valley during calendar years 2012-2016. Using these data, an average annual quantity of water from the Colton Basin Area within San Bernardino Valley delivered for use on lands not within Western nor tributary to the Riverside Narrows was determined for calendar years 2012-2016.

\* Fontana Water Company delivers water extracted from San Bernardino Basin Area and Colton Basin Area as Fontana Union Water Company. The Fontana Water Company water service area is located largely within Chino Basin. However, portions of the Fontana Water Company service area are within Colton Basin Area. Records of the deliveries within the Colton Basin Area were recently provided to the Watermaster and will be incorporated in the Watermaster report for calendar year 2017.

## WEST VALLEY WATER DISTRICT

During the base period 1959-1963 West Valley Water District produced water from the Colton Basin Area within San Bernardino Valley. Using data from Volume 1, Table No. 3; Volume 2, Table No. 3; Volume 3, Table No. 3; State Water Project Deliveries by Turnout; and Table No. 2, Table No. 15 shows extractions from the Colton Basin Area within San Bernardino Valley/State Water Project water during the base period 1959-1963. It also shows deliveries for use on lands not within Western nor tributary to the Riverside Narrows. Using these data, an average annual quantity of water from the Colton Basin Area within San Bernardino Valley and delivered for use on lands not within Western nor tributary to the Riverside Narrows was determined for the base period 1959-1963.

Using data from Volume 1, Table No. 3; Volume 2, Table No. 3; Volume 3, Table No. 3; State Water Project Deliveries by Turnout; and Table No. 2, Table No. 15 also shows extractions from the Colton Basin Area within San Bernardino Valley/State Water Project water during calendar years 2012-2016. Using these data, an average annual quantity of water from the Colton Basin Area within San Bernardino Valley delivered for use on lands not within Western nor tributary to the Riverside Narrows was determined for calendar years 2012-2016.

During the verification of extractions for calendar year 2015, West Valley Water District representatives reported that the method that has been used for determination of the amount of water that West Valley Water District delivered in the Chino Basin Area was not accurate. West Valley Water District representatives reviewed the records of deliveries that had been provided in prior years. West Valley Water District then provided revised determinations of the amounts of that West Valley Water District delivered to lands within Chino Basin for the calendar years 2008 through 2014 together with the amount for calendar year 2015. The revised amounts for calendar years 2012 through 2014 were included in the determinations in Volume 7 for the calendar year 2015. The corrected determinations for calendar years 2008 through 2010 and for calendar years 2011 through 2014 may be found in the Appendix B of the Appendices volume of the Annual Report of the Watermaster for calendar year 2016.

(1) Verified extractions, Volume 3 Report of Watermaster. Includes only those wells that were owned and operated by West Valley Water District in any year. For the years 1959 through 1963, includes well Recordation Numbers; 3601004, 3601434, 3601683 and 3601763. For subsequent years includes wells that West Valley Water District acquired in the year acquired and following years.

CITY OF RIALTO

During the base period 1959-1963 City of Rialto produced water from the Colton Basin Area within San Bernardino Valley. Using data from Volume 1, Table No. 3; Volume 2, Table No. 3; Volume 3, Table No. 3; State Water Project Deliveries by Turnout; and Table No. 2, Table No. 16 shows extractions from the Colton Basin Area within San Bernardino Valley/State Water Project water during the base period 1959-1963. It also shows deliveries for use on lands not within Western nor tributary to the Riverside Narrows. Using these data, an average annual quantity of water from the Colton Basin Area within San Bernardino Valley and delivered for use on lands not within Western nor tributary to the Riverside Narrows was determined for the base period 1959-1963.

Using data from Volume 1, Table No. 3; Volume 2, Table No. 3; Volume 3, Table No. 3; State Water Project Deliveries by Turnout; and Table No. 2, Table No. 16 also shows extractions from the Colton Basin Area/State Water Project water within San Bernardino Valley during calendar years 2012-2016. Using these data, an average annual quantity of water from the Colton Basin Area within San Bernardino Valley delivered for use on lands not within Western nor tributary to the Riverside Narrows was determined for calendar years 2012-2016.

## CHAPTER VI

### INCREASED DELIVERIES FROM THE RIVERSIDE BASIN AREA WITHIN SAN BERNARDINO COUNTY FOR USE ON LANDS NOT WITHIN WESTERN NOR TRIBUTARY TO THE RIVERSIDE NARROWS, AND LOSS OF RETURN FLOW RELATED TO SUCH INCREASED DELIVERIES

In Chapter VI the increased deliveries from Riverside Basin Area within San Bernardino County for use on lands not within Western nor Tributary to the Riverside Narrows and resulting loss of return flow related to such increased deliveries from Colton Basin Area within San Bernardino Valley are determined.

The verified amounts for the base period 1959-1963 are shown in Table I of this report. The verified amounts for calendar years 2012-2016 are shown in Table J. These amounts were determined using data as detailed in the notes on the subsidiary tables.

FONTANA UNION WATER COMPANY

During the base period 1959-1963 Fontana Union Water Company did not produce water from the Riverside Basin Area within San Bernardino County. Using data from Volume 3, Table No. 3, Table No. 17 shows extractions from the Riverside Basin Area within San Bernardino County during the base period 1959-1963. It also shows deliveries for use on lands not within Western nor tributary to the Riverside Narrows. Using these data, an average annual quantity of water from the Riverside Basin Area within San Bernardino County and delivered for use on lands not within Western nor tributary to the Riverside Narrows was determined for the base period 1959-1963.

Using data from Volume 3, Table No. 3, Table No. 17 also shows extractions from the Riverside Basin Area within San Bernardino County during calendar years 2012-2016. Using these data, an average annual quantity of water from the Riverside Basin Area within San Bernardino County delivered for use on lands not within Western nor tributary to the Riverside Narrows was determined for calendar years 2012-2016.

## WEST VALLEY WATER DISTRICT

During the base period 1959-1963 West Valley Water District produced water from the Riverside Basin Area within San Bernardino County. Using data from Volume 1, Table No. 3; Volume 2, Table No. 3; Volume 3, Table No. 3; State Water Project Deliveries by Turnout; and Table No. 2, Table No. 18 shows extractions from the Basin Area within San Bernardino County/State Water Project water during the base period 1959-1963. It also shows deliveries for use on lands not within Western nor tributary to the Riverside Narrows. Using these data, an average annual quantity of water from the Riverside Basin Area within San Bernardino Valley and delivered for use on lands not within Western nor tributary to the Riverside Narrows was determined for the base period 1959-1963.

Using data from Volume 1, Table No. 3; Volume 2, Table No. 3; Volume 3, Table No. 3; State Water Project Deliveries by Turnout; and Table No. 2, Table No. 18 also shows extractions from the Riverside Basin Area within San Bernardino County/State Water Project water during calendar years 2012-2016. Using these data, an average annual quantity of water from the Riverside Basin Area within San Bernardino County delivered for use on lands not within Western nor tributary to the Riverside Narrows was determined for calendar years 2012-2016.

During the verification of extractions for calendar year 2015, West Valley Water District representatives reported that the method that has been used for determination of the amount of water that West Valley Water District delivered in the Chino Basin Area was not accurate. West Valley Water District representatives reviewed the records of deliveries that had been provided in prior years. West Valley Water District then provided revised determinations of the amounts of that West Valley Water District delivered to lands within Chino Basin for the calendar years 2008 through 2014 together with the amount for calendar year 2015. The revised amounts for calendar years 2011 through 2014 were included in the determinations in Volume 7 for the calendar year 2015. The corrected determinations for calendar years 2008 through 2010 and for calendar years 2011 through 2014 may be found in the Appendix B of the Appendices volume of the Annual Report of the Watermaster for calendar year 2016.

(1) Verified extractions, Volume 3 Report of Watermaster. Includes only those wells that were owned and operated by West Valley Water District in any year. For the years 1959 through 1963, includes well Recordation Numbers; 3601004, 3601434, 3601683 and 3601763. For subsequent years includes wells that West Valley Water District acquired in the year acquired and following years.

CITY OF RIALTO

During the base period 1959-1963 City of Rialto produced water from the Riverside Basin Area within San Bernardino County. Using data from Volume 1, Table No. 3; Volume 2, Table No. 3; Volume 3, Table No. 3; State Water Project Deliveries by Turnout; and Table No. 2, Table No. 19 shows extractions from the Riverside Basin Area within San Bernardino County/State Water Project water during the base period 1959-1963. It also shows deliveries for use on lands not within Western nor tributary to the Riverside Narrows. Using these data, an average annual quantity of water from the Riverside Basin Area within San Bernardino Valley and delivered for use on lands not within Western nor tributary to the Riverside Narrows was determined for the base period 1959-1963.

Using data from Volume 1, Table No. 3; Volume 2, Table No. 3; Volume 3, Table No. 3; State Water Project Deliveries by Turnout; and Table No. 2, Table No. 19 also shows extractions from the Riverside Basin Area within San Bernardino County/State Water Project water during calendar years 2012-2016. Using these data, an average annual quantity of water from the Riverside Basin Area within San Bernardino County delivered for use on lands not within Western nor tributary to the Riverside Narrows was determined for calendar years 2012-2016.

CHAPTER VII

LOSS OF RETURN FLOW RELATED TO INCREASED DELIVERIES FROM COLTON BASIN AREA WITHIN SAN BERNARDINO VALLEY AND RIVERSIDE BASIN AREA WITHIN SAN BERNARDINO COUNTY FOR USE ON LANDS NOT WITHIN WESTERN NOR TRIBUTARY TO THE RIVERSIDE NARROWS

The next to last sentence in Paragraph X of the Judgment as amended in the 1992 Amendment provides that:

"San Bernardino Valley shall also be obligated to provide replenishment in the Colton or Riverside Basin, as the case may be, to offset loss of return flow related to any increase over the exports therefrom within San Bernardino Valley for use in any area not within Western nor tributary to Riverside Narrows as set forth in Table C-2 of Appendix "C", such amounts being subject to correction by the Watermaster."

TABLE K

Loss of Return Flow related to increased deliveries from Colton Basin Area within San Bernardino Valley and Riverside Basin Area within San Bernardino County for use on lands not within Western nor tributary to the Riverside Narrows was determined using data from Table Nos. H and J.

TABLE K  
ANNUAL ACCOUNTING FOR  
SAN BERNARDINO VALLEY MUNICIPAL WATER DISTRICT

## CHAPTER VIII

### CREDIT FOR INCREASED RETURN FLOW RELATED TO NEW DELIVERIES OF WATER FROM OUTSIDE THE BASINS TO COLTON BASIN AREA WITHIN SAN BERNARDINO VALLEY AND RIVERSIDE BASIN AREA WITHIN SAN BERNARDINO COUNTY

The last sentence in Paragraph X of the Judgment as amended in the 1992 Amendment provides that:

"Against its replenishment obligation to offset loss of return flow related to any increase in the exports from the Colton Basin Area or Riverside Basin Area within San Bernardino Valley, San Bernardino Valley shall receive credit for that portion of direct delivered water which originated outside that Basin and which returns to the ground water of that Basin."

In Chapter VIII the new deliveries from the San Bernardino Basin Area along with supplies of State Water Project water imported for use on lands within Colton Basin Area within San Bernardino Valley and Riverside Basin Area within San Bernardino County, and resulting increased return flow related to such New Deliveries in Colton Basin Area within San Bernardino Valley and Riverside Basin Area within San Bernardino County are determined.

#### TABLE L

Credit for Increased Return Flow related to New Deliveries of water from outside the Basins to Colton Basin Area within San Bernardino Valley and Riverside Basin Area within San Bernardino County was determined using data from Tables F and No. 20.

TABLE L

VOLUME 7-2016

SECTION V

USES OF WATER IMPORTED FROM THE STATE WATER PROJECT

CHAPTER IX

STATE WATER PROJECT WATER

The San Bernardino Valley Municipal Water District has a Contract with the State of California, Department of Water Resources, for a supply of water from the State Water Project. Deliveries began in December 1972. Deliveries of this imported water are made to many locations within and without San Bernardino Valley Municipal Water District's boundaries in accordance with provisions of the contract. The deliveries within the District boundary include groundwater recharge and direct deliveries for use in the Chino Basin Area within San Bernardino Valley, Colton Basin Area within San Bernardino Valley, San Bernardino Basin Area, and Yucaipa Basin Area.

Table No. 21 shows deliveries of imported water (State Water Project) in recharge categories by basin, and direct delivery categories showing inside the San Bernardino Basin Area and outside the San Bernardino Basin Area deliveries. These values are used in preparation of Table No. 17 in the Annual Report.

Table No. 22 shows deliveries of imported water and San Bernardino Basin Area groundwater to Bear Valley Mutual Water Company (BVMWC) by San Bernardino Valley pursuant to its 1996 agreement with Big Bear Municipal Water District. It is currently assumed that the sum of the imported water and groundwater deliveries equals the amount of native water not available for downstream diversion and use by BVMWC because of reduction in lake releases for local benefit. These amounts of in-lieu delivery are used in preparation of Table No. 17 in the Annual Report.

Table No. 22 was initially developed in preparation of the September 6, 2013 Annual Report and only included the direct delivery of imported water. The table was modified in the August 1, 2015 Annual Report to also include pumped groundwater and the sum of imported water and groundwater was used to directly show

San Bernardino Valley's obligation in Table No. 17 rather than include it as an extraction in Volume 1, Table No. 8.

INTRODUCTION

The settlement of the case of the Orange County Water District, Plaintiff, vs. City of Chino, et al, Defendants, being Case No. 117628 in the Superior Court of the State of California in and for the County of Orange, made necessary a settlement of the case of Western Municipal Water District of Riverside County, et al, vs. East San Bernardino County Water District, which was settled by Stipulated Judgment in Case No. 78426, entered in the Superior Court of the State of California in and for the County of Riverside, on April 17, 1969.

Paragraph VIII of the judgment entitled "Extractions from Colton Basin Area and Riverside Basin Area in San Bernardino County" in subparagraph (d) recites as follows:

VII "Extractions from the Colton Basin Area and that portion of the Riverside Basin Area within San Bernardino County, for use within San Bernardino Valley, shall not be limited. However, except for any required replenishment by Western, San Bernardino Valley shall provide the water to maintain the static water levels in the area, as determined by wells numbered 1S/4W-21Q3, 1S/4W-29H1, and 1S/4W-29Q1 at an average level no lower than that which existed in the Fall season of

1963. Such 1963 average water level is hereby determined to be 822.04 feet above sea level. In future years, the level shall be computed by averaging the lowest static water levels in each of the three wells occurring at or about the same time of the year, provided that no measurements will be used which reflect the undue influence of pumping in nearby wells, or in the three wells, or pumping from the Riverside Basin in Riverside in the three wells, or pumping from Riverside Basin in Riverside County in excess of that determined pursuant to Paragraph IX(a) hereof."

Pursuant to the foregoing, the Watermaster has compiled all available records and data pertinent to the water surface elevation in the three key wells named in the Judgment and shown on Map No. 1. These data, including elevations through December 1971, are presented in "Report of Watermaster, Volume 8" dated June, 1972.

Groundwater elevations of the key wells for calendar years 1972 through 2016 are presented in "Report of Watermaster", Volume 8-1971 through Volume 8-2016. The current report includes the detail data for calendar year 2016 along with graphical summaries of historic water level elevations.

Figures 1, 2, and 3 graphically display the specific static water elevations for each key well that were used to select the lowest elevation for calendar year 2016. Figures 1A, 2A and 3A show the lowest fall static water elevation recorded each year for each of the three wells since about 1935.

Table No. 1 presents the lowest static water level elevation for each well and the average low elevation for the three wells for calendar year 1963 and calendar years 1964-2016.

The basic data compiled in tabular form at the end of this report is based on measurements of depth to water by the City of Riverside (C of R), the United States Geological Survey (USGS), San Bernardino Valley Municipal Water District (SBVMWD), Western Municipal Water District (WMWD) and Watermaster Support Services (Watermaster).

Monthly measurements of the key wells by the USGS began in October 1972 under a cooperative agreement with SBVMWD. In July 1974, the USGS agreement was terminated. The USGS measured Flume No. 2 as part of a different contract with SBVMWD and the data are included in the volume. This agreement was terminated in 2009.

For calendar Year 2016, using the City of Riverside and Watermaster Support Services data, the average of the lowest static level in each well has been determined to be at an elevation of 825.07 feet above mean sea level (msl).

This elevation is 3.03 feet higher than the 1963 minimum (822.04 msl) required by the Judgment. This is a decrease of 11.51 feet from the previous year.

## **ERRATA**

Events noted during the following years:

### Data Year 2016 (April 2017)

Calendar year 2016 was a "normal" rainfall year with the CIMIS weather station at UC Riverside reporting 9.10" of rainfall compared to the +25 year station average of 8.80" (104% of average).

Shut down of the Volume 8 well field was requested from Thursday, November 10th through Monday, November 14th 2016, with the low measurements taken on November 14th.

### Data Year 2015 (February 2016)

Calendar year 2015 was another dry year with the CIMIS weather station at UC Riverside reporting 6.44" of rainfall compared to the +25 year station average of 8.80" (73% of average).

Shut down of the Volume 8 well field was requested from Friday, October 30<sup>th</sup> through Tuesday, November 3<sup>rd</sup> 2015, with measurements taken on November 3<sup>rd</sup> 2015.

### Data Year 2014 (December 2014)

Calendar year 2014 was another dry year with the CIMIS weather station at UC Riverside reporting 7.11" of rainfall compared to the +25 year station average of 8.85" (81% of average).

Between November 17<sup>th</sup> and 23<sup>rd</sup>, City of Riverside, City of Colton and Elsinore Valley MWD shut down all their wells in the area of Johnson and Flume wells giving the Watermaster 6 days for the groundwater basins to stabilize for this year's non-pumping low calculations.

Data Year 2013 (May 2014)

The Watermaster Committee made the decision to accelerate the Western-San Bernardino Watermaster reporting time line this reporting cycle. The Annual Report of the Watermaster for 2014 will be dated for August 1, 2014.

With the earlier publication date, the most recent calendar year water level available is for 2013, which is the same data presented in the Annual Report for 2013.

Data Year 2012 (December 2013)

Calendar year 2013 was another dry year with the CIMIS weather station at UC Riverside reporting 5.89" of rainfall compared to the +25 year station average of 8.93" (68% of average).

The Watermaster staff had requested a one week shut down of the City of Riverside Flume Well Field, City of Colton Fogg wells and Meeks & Daley Sperry well, to create a non-pumping period to allow the water table to stabilize in order that a reasonable seasonal low measurement be taken.

Shut down was for 119 hours, between Wednesday, November 27<sup>th</sup> and December 2<sup>nd</sup>. Riverside and Watermaster staff took a daily manual water level as a control for RPU data loggers.

The small decrease in the average water level, during a another dry year, is attributed to a decrease in Riverside's production of the Flume Tract in 2013.

It is expected that Colton's #30 well will be equipped and ready for operation in early 2014.

# Western San Bernardino Watermaster Well Measurement Record for

**Johnson #1**

State Well Number 1S/4W21Q03S

Water Level Records  
1970-2016

Basin: Colton-Rialto

Reference Point Elevation: 956.06

Reference Point Elevation #2, top of MP: 960

After January 2008, Reference Point Elevation #3, top of MP: 959.37

After October 2009, Reference Point Elevation #4, top of MP inside lid, 954.5

Photo's clockwise from top left - Johnson No. 1 Pump house 1977, Johnson No. 1 Pump and MP 1977, Johnson No.1 lid open May 2010, Johnson No.1 close-up May 2010.
