APPENDIX A

TABLE OF CONTENTS

APPENDIX A

INTRODUCTION

TABLES FROM THE ANNUAL REPORT OF THE WESTERN-SAN
BERNARDINO WATERMASTER

INTRODUCTION

The Annual Report of the Western-San Bernardino Watermaster for calendar year 2012 dated September 6, 2013 included modification of most of the tables in the summary report. Further modifications were made in preparation of the April 1, 2014 and August 1, 2015 Annual Reports. Many of the modifications resulted in changes in logic as well as the specific data commencing in calendar year 1971 and continuing through the current calendar year.

The Judgment requires the Watermaster to report compliance based on calculations for the current year and the five year period ending with the current year. As a result, some tables in the Annual Report show data only for the last five years. A few show data for all years commencing in 1971.

Since many of the modifications changed calculations all the way back to 1971 and some tables in the report only show the last five years, these appendices have been developed primarily to show all the revised historic calculations in any table that has been either modified or is affected by modification of another table. For any such table included in these appendices, the data is shown for the entire period of record 1971 through the current year.

Secondary reasons for these appendices are related to Watermaster's interest in making the report more useful to users that rely on it for basic data necessary for water resource related studies and analyses. All the data in the appendices are in PDF format and may be readily copied or converted to other formats electronically. Adobe Acrobat 8.0 and later have the capability to convert PDF files into Excel files. Please see the specific directions to perform this conversion in the User's Manual for the version of Adobe Acrobat you are using.

In the past, most of the more than forty years of data could only be acquired by accessing individual annual reports; each containing a five year block of data. Therefore, all pertinent historic data used to determine compliance with the provisions of the Judgment is available in Appendix A. Appendix A includes summary report Table Nos. 2 through 17C in sequential order. The

PDFs for Appendix A contain discernible individual files for each of the tables contained therein.

In-Lieu Deliveries Obligation was added to Table No. 17 in the August 1, 2015 Annual Report.

36																																									
37		1 Pursuant to the 2013 Agreement Regarding Additional Extractions of New Conservation Water From the San Bernardino Basin Area (Basin) (2013 Agreement), any amount of replenishment in the Basin resulting from operation of Seven Oaks Dam and related diversion and spreading facilities that, in the absence of such operation, would have been replenished in the Riverside Basin, shall be included in a Riverside Basin Mitigation Account. Such water is referred to herein as Mitigation Water.																																							
38		2 Equal annual average amounts of Mitigation Water determined on the basis of a long term forecast of Seven Oaks related conservation at the Santa Ana River Spreading Grounds. Pursuant to the 2013 Agreement, such forecasts are subject to periodic change and hence the otherwise equal annual amounts may change periodically.																																							
39		3 Specific amounts of Mitigation Water resulting from a determination of prior years (1998-2012) new conservation and any determination of new conservation resulting from conservation through direct use, recharge in the Basin in areas other than the Santa Ana River Spreading Grounds and/or export from the Basin and subsequent return for direct use or recharge.																																							
40		4 Long Term Forecast Annual Average Amounts plus Specific Year Amounts.																																							
41		5 Accumulated amount of Mitigation Account Additions includes amounts accumulated prior to the current five-year period.																																							
42		6 Pursuant to the 2013 Agreement, the City of Riverside may be required to extract San Bernardino Basin Area water that is included in the Mitigation Account and reduce extractions in its Flume Tract wells in the Riverside Basin by the same amount. Similarly, San Bernardino Valley may choose to extract water that is included in the Mitigation Account and deliver it for recharge in the Riverside Basin.																																							
43		7 Amounts of Mitigation Water extracted by City of Riverside pursuant to the 2013 Agreement.																																							
44		8 Amounts of Mitigation Water extracted by any producer other than Plaintiffs for delivery and recharge in the Riverside Basin.																																							
45		9 Extractions by City of Riverside plus Extractions by Other Than Plaintiffs.																																							
46		10 Accumulated amount of Mitigation Account Extractions includes amounts accumulated prior to the current five-year period.																																							
47		11 The amount of Mitigation Water Additions to the Mitigation Account minus the amount of Mitigation Water Extractions from the Mitigation Account by City of Riverside and by Other Than Plaintiffs in San Bernardino County.																																							
48		12 Based on calculations by GEOSCIENCE/SAIC in an August 1, 2013 Technical Memorandum to Western and San Bernardino Valley, Watermaster determined that 483 acre-feet/year of Mitigation Water should be included in the Riverside Basin Mitigation Account based on the current maximum spreading grounds diversion rate of 195 cfs. Inclusion of such annual average amount of Mitigation Water continues annually until another long term forecast results in a change.																																							
49		13 Based on calculations by GEOSCIENCE/SAIC in an August 1, 2013 Technical Memorandum to Western and San Bernardino Valley, Watermaster determined that during prior years 1998-2012, 2,713 acre-feet of Mitigation Water should be included in the Riverside Basin Mitigation Account.

APPENDIX B

TABLE OF CONTENTS

APPENDIX B

INTRODUCTION

TABLES FROM VOLUME 1 AND VOLUME 7 OF THE ANNUAL REPORT OF
THE WESTERN-SAN BERNARDINO WATERMASTER

INTRODUCTION

The Annual Report of the Western-San Bernardino Watermaster for calendar year 2012 dated September 6, 2013 included modification of most of the tables in the summary report. Further modifications were made in preparation of the April 1, 2014 and August 1, 2015 Annual Reports. Many of the modifications resulted in changes in logic as well as the specific data commencing in calendar year 1971 and continuing through the current calendar year.

The Judgment requires the Watermaster to report compliance based on calculations for the current year and the five year period ending with the current year. As a result, some tables only show data for the last five years. A few show data for all years commencing in 1971.

Since many of the modifications changed calculations all the way back to 1971 and some tables in the report only show the last five years, these appendices have been developed primarily to show all the revised historic calculations in any table that has been either modified or is affected by modification of another table. For any such table included in these appendices, the data is shown for the entire period of record 1971 through the current year.

Secondary reasons for these appendices are related to Watermaster's interest in making the report more useful to users that rely on it for basic data necessary for water resource related studies and analyses. All the data in the appendices are in PDF format and may be readily copied or converted to other formats electronically. Adobe Acrobat 8.0 and later have the capability to convert PDF files into Excel files. Please see the specific directions to perform this conversion in the User's Manual for the version of Adobe Acrobat you are using.

Appendix B includes tables with basic source data commencing in 1971 that are affected by the modifications made in 2013, 2014 and 2015. These tables are in Report of Watermaster Volume 1 and Volume 7.

Volume 1 was modified during preparation of the September 6, 2013 Annual Report to more accurately account for the high groundwater mitigation program and the direct delivery of imported water to Bear Valley

Mutual Water Company (BVMWC) in-lieu of stream diversions of native water not released from Big Bear Lake for the benefit of the local mountain community.

In calendar year 2014, pursuant to its 1996 agreement with Big Bear Municipal Water District, San Bernardino Valley delivered both imported water and pumped groundwater to BVMWC. Although groundwater had been delivered from 1977, 1985 through 1990 and again in 2001, none had been delivered recently and no accounting procedure was included in previous Annual Reports. Therefore, further modification of the accounting procedure for Big Bear in-lieu deliveries was necessary in the August 1, 2015 Annual Report.

In 2013, direct delivery of in-lieu imported water was accounted for by adding the amount of such water to the total groundwater production in Volume 1, Table No. 8. Such increase in extractions causes storage in the San Bernardino Basin Area to be unaffected by the loss of streamflow when reduction in surface water diversion by BVMWC is offset by an equal amount of direct delivery of imported water; provided return flow from the imported water is excluded, in Volume 7, Table No. 22.

Accounting for groundwater pumped in-lieu of surface water diversions cannot be as readily accomplished in Volume 1, Table No. 8. Rather than develop a separate accounting for in-lieu groundwater, Watermaster determined that both direct delivered in-lieu and groundwater in-lieu water could be accounted for jointly as an obligation in Table No. 17. So, an obligation entitled, "In-Lieu Deliveries Obligation" was added to Table No. 17 in the August 1, 2015 Annual Report and used to account for both direct delivered in-lieu and pumped groundwater in-lieu water for calendar year 2014 and all prior years in which either or both types of water were delivered by San Bernardino Valley. As a result, Line 35 entitled, "SWP Water BBMWD In-Lieu Deliveries" was removed from Volume 1, Table No. 8 in the August 1, 2015 Annual Report.

Volume 7 was modified in 2013 and 2014 to comply with provision of the Judgment related to export from the San Bernardino Basin Area by users in San Bernardino County and to preserve the hydrologic integrity of the Basin. Numerous tables from Volume 7 have been added and are also included in Appendix B.

In 2015, Volume 7, Table Nos. 21 and 22 were further modified by deleting the exclusion of the direct delivered in-lieu water from the calculation of return flow from direct delivery of imported water. Such exclusion is no longer appropriate when accounting for in-lieu water is addressed as an obligation in Table No. 17, as described above. In-lieu groundwater delivery was also added to Table No. 22 in 2015.

In 2016, during the verification of extractions and deliveries for Volume 7-2015, West Valley Water District representatives reported that the method that has been used for determination of the amount of water that West Valley Water District delivered in the Chino Basin Area was not accurate. West Valley Water District representatives reviewed the records of deliveries that had been provided in prior years. West Valley Water District then provided revised determinations of the amounts that West Valley Water District delivered to lands within Chino Basin for the calendar years 2008 through 2014 together with the amount for calendar year 2015. The revised amounts for calendar years 2011 through 2015 were included in the determinations in Volume 7-2015. The corrected determinations for calendar years 2008 through 2015 are included in this Appendix B of this Appendices volume of the Annual Report of the Western-San Bernardino Watermaster for calendar year 2018.

Column explanation:

- (2) Verified extractions, Volume 1 Report of Watermaster. Excludes Lytle Creek Diversion Recordation No. 3601718. Includes only those wells that were owned and operated by City of Rialto in any year. For the years 1959 through 1963 includes well Recordation Nos. 3601263 and 3602080. For subsequent years, includes wells that City of Rialto acquired in the year acquired and following years.
- (3) Metered inflow to City of Rialto Filter Plant City of Rialto Records, which includes water delivered under stock entitlement that City of Rialto owns in West Valley Water District and purchases from Fontana Union Water Co. (Rialto Filter Plant 3601718)
- (4) Verified extractions, Volume 2, Report of Watermaster. Includes production of Wells Recordation Nos. 3602269 & 3602271 after acquisition by City of Rialto.
- (5) City of Rialto Records of Purchases. Purchases from SBVMWD Baseline Feeder commencing 1990.
- (6) Sum Columns (2) + (3) + (4) + (5).
- (7) Well Recordation No. 3602270 acquired by City of Rialto in 1966 and wells constructed by City of Rialto (3603175 & 3603537)
- (8) Sum Columns (6) + (7).
- (9) Metered deliveries in Chino Basin from City of Rialto Billing Records beginning 1971. Base period years revised during 1973 verification to reflect 18% average distribution of metered deliveries by City of Rialto records for years 1971 through 1974.
- (10) Same as Column (7).
- (11) Difference Column (9) minus Column (10).
- (12) Assumed for Base Period. 1971 to date estimated weighted average return flow percentage based on: 1) metered agricultural and park deliveries with no return flow, 2) metered residential deliveries at 40 percent return flow, and 3) metered industrial deliveries (Phototron Company) at 90 percent return flow. In May 2009 a detailed study was completed which is described in text on previous page.
- (13) Product Column (11) times Column (12).
- (14) Difference Column (11) minus Column (13) net export of water produced in San Bernardino & Colton Basin Areas to Chino Basin.
