APPENDIX A

TABLE OF CONTENTS

APPENDIX A

INTRODUCTION

TABLES FROM THE ANNUAL REPORT OF THE WESTERN-SAN
BERNARDINO WATERMASTER

INTRODUCTION

The Annual Report of the Western-San Bernardino Watermaster for calendar year 2012 dated September 6, 2013 included modification of most of the tables in the summary report. Further modifications were made in preparation of the April 1, 2014 and August 1, 2015 Annual Reports. Many of the modifications resulted in changes in logic as well as the specific data commencing in calendar year 1971 and continuing through the current calendar year.

The Judgment requires the Watermaster to report compliance based on calculations for the current year and the five year period ending with the current year. As a result, some tables in the Annual Report show data only for the last five years. A few show data for all years commencing in 1971.

Since many of the modifications changed calculations all the way back to 1971 and some tables in the report only show the last five years, these appendices have been developed primarily to show all the revised historic calculations in any table that has been either modified or is affected by modification of another table. For any such table included in these appendices, the data is shown for the entire period of record 1971 through the current year.

Secondary reasons for these appendices are related to Watermaster's interest in making the report more useful to users that rely on it for basic data necessary for water resource related studies and analyses. All the data in the appendices are in PDF format and may be readily copied or converted to other formats electronically. Adobe Acrobat 8.0 and later have the capability to convert PDF files into Excel files. Please see the specific directions to perform this conversion in the User's Manual for the version of Adobe Acrobat you are using.

In the past, most of the more than forty years of data could only be acquired by accessing individual annual reports; each containing a five year block of data. Therefore, all pertinent historic data used to determine compliance with the provisions of the Judgment is available in Appendix A. Appendix A includes summary report Table Nos. 2 through 17C in sequential order. The

PDFs for Appendix A contain discernible individual files for each of the tables contained therein.

In-Lieu Deliveries Obligation was added to Table No. 17 in the August 1, 2015 Annual Report.

89		<i>San Bernardino Basin Area Excluding Minor Production and delivery amounts to Plaintiffs.</i>												
90														
91		1 Adjusted Right not effective until January 1, 1972; therefore, 1971 Base Right is as verified for five-year Base Period 1959-63												
92		2 New Conservation Allocation takes effect in the first year shown and continues until further adjusted by Watermaster.												
93		Pursuant to Paragraph VI(c) of the Judgment, Watermaster has determined the other than Plaintiffs New Conservation												
94		Allocation to be 5,507 acre-feet per year starting in 2013. The 2013 Paragraph VI(b)6 Agreement provides that Watermaster												
95		will periodically consider changing this number based on provisions of the Agreement.												
96		3 Adjusted Right equals Safe Yield Adjusted Right plus New Conservation Allocation.												
97		4 Amount deducted under February 25, 1985 and August 21, 1985 Judgment Paragraph VI(b)6 Agreement. (High Groundwater												
98		Mitigation)

92																		
93										ADJUSTED RIGHT OF								
94										AGUA MANSA WATER COMPANY AND MEEKS & DALEY WATER COMPANY								
95										TO EXTRACT FROM THE SAN BERNARDINO BASIN AREA								
96										FOR USE IN EACH SERVICE AREA								
97																		
98										1 Safe Yield Adjusted Right became effective on January 1, 1972; Base Right for Calendar Year 1971 is as shown in Table B-1 of the								
99										Judgment.								
100										2 New Conservation Allocation takes effect in the first year shown and continues until further adjusted by Watermaster.								
101										Pursuant to Paragraph VI(b) of the Judgment, Watermaster has determined the Agua Mansa Water Company and Meeks & Daley								
102										Water Company New Conservation Allocation to be 258 acre-feet per year starting in 2013.								
103										The 2013 Paragraph VI(b)6 Agreement provides that Watermaster will periodically consider changing this number based on								
104										provisions of the Agreement.								
105										3 Adjusted Right equals Safe Yield Adjusted Right plus New Conservation Allocation								
106										4 New Conservation Allocation may also be used in the San Bernardino Basin Area, or the Colton Basin Area and Riverside Basin								
107										Area in San Bernardino County.

48	1 See Table No. 2 of Watermaster Report.															11 See Report of Watermaster, Volume 7, Table No. 21, 8 imported water recharged in SBBA.																					
49	2 See Table No. 15A of Watermaster Report.															12 Return from Imported Water equals 36% of direct delivered imported water. See Report of Watermaster, Volume 7, Table No. 22.																					
50	3 See Table No. 15B of Watermaster Report.															13 Return from New Conservation equals 36% of New Conservation. See Table No. 2 of Watermaster Report.																					
51	4 Extractions minus New Export minus New Deliveries.															14 Accumulated values include amounts accumulated prior to current 5-year period.																					
52	5 Adjusted Right minus Extractions excluding New Export and New Deliveries, if positive.															15 Equals Excess Extractions excluding New Export and New Deliveries.																					
53	6 Extractions excluding New Export and New Deliveries minus Adjusted Right, if positive.															16 Return from Under Extractions equals 36% of Extraction Credit.																					
54	7 Amounts which may be extracted without replenishment obligation, which in fact are not extracted. Equals Under Extractions excluding New Export and New Deliveries.															17 New Export Obligation equals New Export, if positive.																					
55	8 Return from Excess Extractions equals 36% of Extraction Obligation.															18 New Deliveries Obligation equals New Deliveries, if positive.																					
56	9 New Export Credit equals New Export, if negative.															19 Obligation resulting from the reduction in flow of the Santa Ana River of an amount assumed to be equal to the sum of imported water and pumped groundwater delivered to Bear Valley Mutual Water Company in-lieu of surface water diversions, pursuant to a 1996 agreement between San Bernardino Valley and Big Bear Municipal Water District. See Volume 7, Table No. 22.																					
57	10 New Deliveries Credit equals New Deliveries, if negative.																																				
59																																					
60																20 Net Credit or Obligation for this calendar year.

37	1 Pursuant to the 2013 Agreement Regarding Additional Extractions of New Conservation Water From the San Bernardino Basin Area (Basin) (2013 Agreement), any amount of replenishment in the Basin resulting from operation of Seven Oaks Dam and related diversion and spreading facilities that, in the absence of such operation, would have been replenished in the Riverside Basin, shall be included in a Riverside Basin Mitigation Account. Such water is referred to herein as Mitigation Water.																																											
38	2 Equal annual average amounts of Mitigation Water determined on the basis of a long term forecast of Seven Oaks related conservation at the Santa Ana River Spreading Grounds. Pursuant to the 2013 Agreement, such forecasts are subject to periodic change and hence the otherwise equal annual amounts may change periodically.																																											
39	3 Specific amounts of Mitigation Water resulting from a determination of prior years (1998-2012) new conservation and any determination of new conservation resulting from conservation through direct use, recharge in the Basin in areas other than the Santa Ana River Spreading Grounds and/or export from the Basin and subsequent return for direct use or recharge.																																											
40	4 Long Term Forecast Annual Average Amounts plus Specific Year Amounts.																																											
41	5 Accumulated amount of Mitigation Account Additions includes amounts accumulated prior to the current five-year period.																																											
42	6 Pursuant to the 2013 Agreement, the City of Riverside may be required to extract San Bernardino Basin Area water that is included in the Mitigation Account and reduce extractions in its Flume Tract wells in the Riverside Basin by the same amount. Similarly, San Bernardino Valley may choose to extract water that is included in the Mitigation Account and deliver it for recharge in the Riverside Basin.																																											
43	7 Amounts of Mitigation Water extracted by City of Riverside pursuant to the 2013 Agreement.																																											
44	8 Amounts of Mitigation Water extracted by any producer other than Plaintiffs for delivery and recharge in the Riverside Basin.																																											
45	9 Extractions by City of Riverside plus Extractions by Other Than Plaintiffs.																																											
46	10 Accumulated amount of Mitigation Account Extractions includes amounts accumulated prior to the current five-year period.																																											
47	11 The amount of Mitigation Water Additions to the Mitigation Account minus the amount of Mitigation Water Extractions from the Mitigation Account by City of Riverside and by Other Than Plaintiffs in San Bernardino County.																																											
48	12 Based on calculations by GEOSCIENCE/SAIC in an August 1, 2013 Technical Memorandum to Western and San Bernardino Valley, Watermaster determined that 483 acre-feet/year of Mitigation Water should be included in the Riverside Basin Mitigation Account based on the current maximum spreading grounds diversion rate of 195 cfs. Inclusion of such annual average amount of Mitigation Water continues annually until another long term forecast results in a change.																																											
49	13 Based on calculations by GEOSCIENCE/SAIC in an August 1, 2013 Technical Memorandum to Western and San Bernardino Valley, Watermaster determined that during prior years 1998-2012, 2,713 acre-feet of Mitigation Water should be included in the Riverside Basin Mitigation Account.

APPENDIX B

TABLE OF CONTENTS

APPENDIX B

INTRODUCTION

TABLES FROM VOLUME 1 AND VOLUME 7 OF THE ANNUAL REPORT OF
THE WESTERN-SAN BERNARDINO WATERMASTER

INTRODUCTION

The Annual Report of the Western-San Bernardino Watermaster for calendar year 2012 dated September 6, 2013 included modification of most of the tables in the summary report. Further modifications were made in preparation of the April 1, 2014 and August 1, 2015 Annual Reports. Many of the modifications resulted in changes in logic as well as the specific data commencing in calendar year 1971 and continuing through the current calendar year.

The Judgment requires the Watermaster to report compliance based on calculations for the current year and the five year period ending with the current year. As a result, some tables only show data for the last five years. A few show data for all years commencing in 1971.

Since many of the modifications changed calculations all the way back to 1971 and some tables in the report only show the last five years, these appendices have been developed primarily to show all the revised historic calculations in any table that has been either modified or is affected by modification of another table. For any such table included in these appendices, the data is shown for the entire period of record 1971 through the current year.

Secondary reasons for these appendices are related to Watermaster's interest in making the report more useful to users that rely on it for basic data necessary for water resource related studies and analyses. All the data in the appendices are in PDF format and may be readily copied or converted to other formats electronically. Adobe Acrobat 8.0 and later have the capability to convert PDF files into Excel files. Please see the specific directions to perform this conversion in the User's Manual for the version of Adobe Acrobat you are using.

Appendix B includes tables with basic source data commencing in 1971 that are affected by the modifications made in 2013, 2014 and 2015. These tables are in Report of Watermaster Volume 1 and Volume 7.

Volume 1 was modified during preparation of the September 6, 2013 Annual Report to more accurately account for the high groundwater mitigation program and the direct delivery of imported water to Bear Valley

Mutual Water Company (BVMWC) in-lieu of stream diversions of native water not released from Big Bear Lake for the benefit of the local mountain community.

In calendar year 2014, pursuant to its 1996 agreement with Big Bear Municipal Water District, San Bernardino Valley delivered both imported water and pumped groundwater to BVMWC. Although groundwater had been delivered from 1977, 1985 through 1990 and again in 2001, none had been delivered recently and no accounting procedure was included in previous Annual Reports. Therefore, further modification of the accounting procedure for Big Bear in-lieu deliveries was necessary in the August 1, 2015 Annual Report.

In 2013, direct delivery of in-lieu imported water was accounted for by adding the amount of such water to the total groundwater production in Volume 1, Table No. 8. Such increase in extractions causes storage in the San Bernardino Basin Area to be unaffected by the loss of streamflow when reduction in surface water diversion by BVMWC is offset by an equal amount of direct delivery of imported water; provided return flow from the imported water is excluded, in Volume 7, Table No. 22.

Accounting for groundwater pumped in-lieu of surface water diversions cannot be as readily accomplished in Volume 1, Table No. 8. Rather than develop a separate accounting for in-lieu groundwater, Watermaster determined that both direct delivered in-lieu and groundwater in-lieu water could be accounted for jointly as an obligation in Table No. 17. So, an obligation entitled, "In-Lieu Deliveries Obligation" was added to Table No. 17 in the August 1, 2015 Annual Report and used to account for both direct delivered in-lieu and pumped groundwater in-lieu water for calendar year 2014 and all prior years in which either or both types of water were delivered by San Bernardino Valley. As a result, Line 35 entitled, "SWP Water BBMWD In-Lieu Deliveries" was removed from Volume 1, Table No. 8 in the August 1, 2015 Annual Report.

Volume 7 was modified in 2013 and 2014 to comply with provision of the Judgment related to export from the San Bernardino Basin Area by users in San Bernardino County and to preserve the hydrologic integrity of the Basin. Numerous tables from Volume 7 have been added and are also included in Appendix B.

In 2015, Volume 7, Table Nos. 21 and 22 were further modified by deleting the exclusion of the direct delivered in-lieu water from the calculation of return flow from direct delivery of imported water. Such exclusion is no longer appropriate when accounting for in-lieu water is addressed as an obligation in Table No. 17, as described above. In-lieu groundwater delivery was also added to Table No. 22 in 2015.

In 2016, during the verification of extractions and deliveries for Volume 7-2015, West Valley Water District representatives reported that the method that has been used for determination of the amount of water that West Valley Water District delivered in the Chino Basin Area was not accurate. West Valley Water District representatives reviewed the records of deliveries that had been provided in prior years. West Valley Water District then provided revised determinations of the amounts that West Valley Water District delivered to lands within Chino Basin for the calendar years 2008 through 2014 together with the amount for calendar year 2015. The revised amounts for calendar years 2011 through 2015 were included in the determinations in Volume 7-2015. The corrected determinations for calendar years 2008 through 2015 are included in this Appendix B of this Appendices volume of the Annual Report of the Western-San Bernardino Watermaster for calendar year 2018.

Column Explanation:

- (2) Table No. 1 of Volume No. 1 of the Watermaster Report (FUWC and SGVWC). Excluding Miller Narrows Wells Recordation No.'s 3600588 and 3600590 and Lytle Creek Diversion Recordation No. 3600591.
- (3) United States Geological Survey (11062820) and Fontana Union Water Company records of diversions from Fontana Powerhouse Afterbay, including deliveries to CEMEX.
- (4) Line No.17, for 1959-63 and Line No.19 for 1971 to date on Table No.4 of Volume No.1 of the Watermaster Report (excludes production of Fontana Union Well No. 27, Recordation No. 3600582).
- (5) Table No.1 of Volume No.2 of the Watermaster Report (excluding Wells Recordation No.'s 3600577, 3600578, 3600589, 3603060, 3603626, 3603726, 3603739, 3603764, 3603765 & 3603974 which are not within S.B.V.M.W.D.).
- (6) Sum of Columns (2) + (3) + (4) + (5).
- (7) Fontana Union Water Company Records used beginning in 2017. Previously used Cemex records. Estimated in other years when data unavailable.
- (8) Fontana Union Water Company Records Total Production of Fontana Union Well No. 1, Recordation No. 3600561.
File closed in 1987.
- (9) Fontana Union Water Company Records.
- (10) Fontana Union Water Company Records.
- (11) Sum of Columns (7) + (8) + (9) + (10).
- (12) Difference of Column (6) minus Column (11).

Column Explanation:

- (2) Amount includes production of Wells Rec. Nos. 3600379, 3600380 & 3601005. Between 2003-2011, using Chino Basin Watermaster Annual Report, Appendix J. Starting with the CY 2012 report, data was provided by West Valley Water District.
- (2a) Amount of Supplemental Water purchased by and delivered to Marygold Mutual Water Company through West Valley Water District facilities. Data provided by West Valley Water District.
- (2b) Amount includes production of Wells Rec. 3600379, 3600380, 3601005, 3603757 & 3603772.
- (3) So. Calif. Water Co. Well Rec. No. 3600379 purchased by W.S.B.C.W.D. in 1970. Has been destroyed
- (4) So. Calif. Water Co. Well Rec. No. 3600380 purchased by W.S.B.C.W.D. in 1970. Has been destroyed
- (5) Former Citizens Land & Water Co. merged in 1962 to form W.S.B.C.W.D. Presently a monitoring well.
- (5a) West Valley Water District Well No. 37 Rec. No. 3603757 located in Chino Basin.
- (5b) West Valley Water District Well No. 42 Rec. No. 3603772 located in Chino Basin.
- (6) Column (3) + (4) + (5) + (5a) + (5b).
- (7) Column (2) minus (6). Deliveries in Chino Basin from production in San Bernardino Basin and Colton Basin Area.

* West San Bernardino County Water District (WSBCWD) now West Valley Water District.

Column explanation:

- (2) Verified extractions, Volume 1 Report of Watermaster. Excludes Lytle Creek Diversion Recordation No. 3601718. Includes only those wells that were owned and operated by City of Rialto in any year. For the years 1959 through 1963 includes well Recordation Nos. 3601263 and 3602080. For subsequent years, includes wells that City of Rialto acquired in the year acquired and following years.
 - (3) Metered inflow to City of Rialto Filter Plant City of Rialto Records, which includes water delivered under stock entitlement that City of Rialto owns in West Valley Water District and purchases from Fontana Union Water Co. (Rialto Filter Plant 3601718)
 - (4) Verified extractions, Volume 2, Report of Watermaster. Includes production of Wells Recordation Nos. 3602269 & 3602271 after acquisition by City of Rialto.
 - (5) City of Rialto Records of Purchases. Purchases from SBVMWD Baseline Feeder commencing 1990.
 - (6) Sum Columns (2) + (3) + (4) + (5).
 - (7) Well Recordation No. 3602270 acquired by City of Rialto in 1966 and wells constructed by City of Rialto (3603175 & 3603537)
 - (8) Sum Columns (6) + (7).
 - (9) Metered deliveries in Chino Basin from City of Rialto Billing Records beginning 1971. Base period years revised during 1973 verification to reflect 18% average distribution of metered deliveries by City of Rialto records for years 1971 through 1974.
 - (10) Same as Column (7).
 - (11) Difference Column (9) minus Column (10).
 - (12) Assumed for Base Period. 1971 to date estimated weighted average return flow percentage based on: 1) metered agricultural and park deliveries with no return flow, 2) metered residential deliveries at 40 percent return flow, and 3) metered industrial deliveries (Phototron Company) at 90 percent return flow. In May 2009 a detailed study was completed which is described in text on previous page.
 - (13) Product Column (11) times Column (12).
 - (14) Difference Column (11) minus Column (13) net export of water produced in San Bernardino & Colton Basin Areas to Chino Basin.
- City of Rialto production values changed due to MIRO 3 (3603979) backfilings.

APPENDIX C

TABLE OF CONTENTS

APPENDIX C

INTRODUCTION

TABLES FROM VOLUMES 1A, 2, 3, 4, 5, 6, AND 8 OF THE ANNUAL REPORT OF
THE WESTERN-SAN BERNARDINO WATERMASTER

INTRODUCTION

The Judgment requires the Watermaster to report compliance based on calculations for the current year and the five year period ending with the current year. As a result, most tables only show data for the last five years. A few tables show data for all years commencing in 1971. In order to provide the historical calculations through 1971, Appendix C includes tables from Volume 1A-2017, Volume 2-2017, Volume 3-2017, Volume 4-2017, Volume 5-2017, Volume 6-2017, and Volume 8-2016.

Secondary reasons for these appendices are related to Watermaster's interest in making the report more useful to users that rely on it for basic data necessary for water resource related studies and analyses. In 2014, the Watermaster began a database update and improvement process to enhance the well recordation program for both well owners and the Watermaster. As a result of the changes to the process, Watermaster determined that the volumes needed to be changed to only include the current five-year period. In addition, as the transitional work progressed, comparisons of previously reported data were made using the old and new data processes. Where inconsistencies were found, methodical research was conducted to validate information used and based on available records, a determination was made by Watermaster to correct all information reported. Furthermore, many outdated, redundant and unused tables were eliminated or changed based on current conditions within the Watermaster boundaries. In July, 2019, in order to establish consistency, Watermaster adopted a procedure to hold all data before 2014 static. Although unlikely, Watermaster can modify pre-2014 data should it become necessary.

- Column 1 Riverside Highland delivery made from water produced in the San Bernardino Basin Area. Water is commingled with production from other basins by RH and delivered by this company. See Riverside Highland tabulation for basin allocation of water production.
- Column 2 Salazar Water Company delivery made in San Bernardino County from the canal of the Riverside Water Company, which contains commingled water produced from Bunker Hill, Colton, and Riverside Basins, all within San Bernardino County. Delivery is made directly to the West Riverside Canal and transported by this canal directly to Riverside County southerly of the County Line.
- Column 3 Trujillo Water Company. For the period 1947 through a portion of 1952, deliveries were made to the Trujillo Water Company at a point in San Bernardino County from the Canal of the Riverside Water Company, which contained a commingled water supply produced from the Bunker Hill, Colton and Riverside Groundwater Basins, all within San Bernardino County. For this period a portion of the 1952 through 1965, deliveries to the Trujillo Water Company were made from the Williams Well, producing water from that portion of the Riverside Ground Water Basin lying within San Bernardino County. The service area of the Trujillo Water company lies astride the Riverside-San Bernardino County Line, and during both of the periods described above, water was delivered both in San Bernardino County and in Riverside County to shareholders entitled to received this water by ownership of Trujillo Water Company stock, In addition, deliveries were also made from the Williams Well for overlying use on the Williams Ranch, situated within San Bernardino County. Tabulations of this proecution and the inter-county deliveries are shown in detail on Table Nos. 4, 5, 6, and 7.
- Column 4 Deliveries to the Jurupa Ditch Company are made directly from the production from the Jurupa Wells, situated within the San Bernardino County in the Riverside Groundwater Basin and exported across the County Line to Riverside County. Deliveries for overlying use in San Bernardino County are also made from these wells for use on the Jurupa Ranch in San Bernardino County. A tabulation of overlying use from the Jurupa Wells within San Bernardino County and exported to Riverside County are shown in Table No. 8. No other breakdown is required.
- Column 5 Water delivered to the Southern California Edison Company Highgrove Power Plant was delivered from 1952 though 1963 from commingled water supply in the Riverside Water Company Canal, which was produced entirely with San Bernardino County from the Bunker Hill, Colton and Riverside Groundwater Basins. An allocation of this production, by basin, is shown in Table No. 10.
- Column 6 The Pellissier Ranch, which is owned by the City of Riverside, overlies that portion of the Riverside Groundwater Basin situated within San Bernardino County, and water is produced by wells located thereon for overlying use within San Bernardino County. The production from these wells is shown in Table No. 2, Line 21.
- Column 7 Change of ownership to Stapakis, William S., in calendar year 1974.
- Column 8 The delivery to the City of San Bernardino was made during the years of 1959 and 1960 from water produced in the Bunker Hill Basin from the Garner Wells.

Columns (2) & (3) Gage Records

Column (4) $632 \text{ Ac. Ft.} / 326 \text{ days} = 1.94$ for Years 1947 through 1952 = Col. (6)/Col. (2)

Column (5) $(4) \times (2)$

Column (6) Gage Canal Records

Column (7) = Column (3) - Column (5) or Column (3) - Column (6)

From 1968 to 1973, the Gage Canal has provided the Watermaster with just that portion of water delivered to East Riverside Water Co. that was used within San Bernardino County.

** Beginning in 1974 all water delivered to East Riverside Water Co. within San Bernardino County was produced by the DeBerry Well which is located in the Riverside Basin within San Bernardino County.

FOR YEARS PRECEDING 1971: Refer to Volume 5, August 1976, Page I-47

FOR YEARS PRECEDING 1971: Refer to Volume 5, August 1976, Page I-58.

L.C. #2, R.H. #8, Flowing, #10, #11 were abandoned &/or Filed Closed before 1971.

° Abandoned &/or File Closed.

* 1984 L.C. flowed artesian during the year, RH filed on pumped total of 1,891 af. Watermaster calculated 2300 af as reasonable.

** 1985 Filed 2,748. Large known loss near well site of 868 af.

*** During 2017 verification added production to Raub 6 and Raub 8 for 2005 and 2006

Column (5) = Column (2) + (3) + (4).

Column (15) = Sum of Columns (6) thru Column (14).

Column (16) = Column (5) + Column (15).

Adjusted Base Right from Annual Report, Table 11

This table show all production "booked" against RH including the water going directly into Cof R system

Replaced by Table 23R starting with 1990.

Columns (2), (3), (4), (5), (6), (10) & (12) are from Company Records, "Condensed Water Summary".

Column (2) Includes water delivered by other companies.

Columns (7) (8) (9) See Notes.

Columns (11), (13), (15), (16) See Worksheets.

Column (14) = Column (11) + Column (13).

Column (17) = Column (15) + Column (16).

* Assumed domestic loss at 15% with Column (7) as total system loss.

** Assumed domestic loss at 20% with Column (7) as total system loss, known loss in L.C. Line of 868 af.

° Assumed domestic loss at 25% with Column (7) as total system loss.

°° Assumed domestic loss at 24% with Column (7) as total system loss.

FOR YEARS PRECEDING 1971: Refer to Volume 5, August 1976, Page I-73.

General Notes:

- (a) Production shown is from Well 1S/4W-18G. This well is owned by City of Colton and no production from this well was made by La Sierra Water Co. prior to 1964. Beginning in 1964, production by Colton recorded under 3601259 and by La Sierra under 3602227.
- (b) Production shown includes water from 1S/4W-18F. This well is owned by the City of Colton and no production from this well was made by La Sierra prior to 1964. Beginning in 1964, production by Colton recorded under 3601261 and by La Sierra under 3602228.
- (c) La Sierra Well No. 10 delivered directly to Edison steam Plant in Highgrove 1959-63. Beginning in 1964, Temescal Water Co. in Riverside County purchased the flow of La Sierra No. 10 Well from Southern California Edison Company.

FOR YEARS PRECEDING 1971: Refer to Volume 5, August 1976, Page III-21.

Data from City of Riverside Records

Column (4) - Starting July 1, 1973, the City of Riverside took over operation of the Southwest Water Company (Meter Book area 15).

At the time water used in that area was reported directly in Acre Feet [See Table 1A, Column (4)].

In 1975 Meter Book Areas 17 and 18 were split off of Meter Book 15 and all three areas are now reported by number of active meters.

In 1977 Meter Book Areas 17 and 18 were recombined with Meter Book 15.

* Corrected values

** Starting in 1983, the City is able to generate an annual tabulation of water use in areas not tributary to the Riverside Narrows.

Columns (1) through (9) were estimated as follows: Using the factor Acre Feet per connection, obtained for the year 1965 for each Meter Book Area said duty use factors were adjusted for subsequent and preceeding years to compensate for consumptive variances, due to temperature and rainfall, by a ratio based on the ratio of total Annual System Production to Annual System Population for each year as compared to the same ratio for the year 1965.

Column (4) - Starting on July 1 1973, the City of Riverside took over operation of the Southwest Water Company (Meter Book Area 15).

At the time water use in that area was reported directly in acre feet.

Columns (6) and (7) - In 1975, Meter Book areas 17 and 18 were split off of Meter Book 15 and all three areas are now reported by number of active meters.

Column (10) = Total of Columns (1) through (9).

Column (12) = Total treated W.M.W.D. CRA water via WR-10 to the City of Riverside Filter Plant.

Column (13) = Column (12) x 2/3.

Column (14) = Total production from former Southwest Water Company Wells.

Column (15) = During the verification process for the 2011 reporting, the amounts of high groundwater mitigation additional extractions were deleted because such amounts were included in a modification of Table 14 in the Annual Report. Therefore the data in the column has been removed.

Column (16) = Column (10) minus Columns (11) (13) (14) and (15).

See notes on Table 1 about Meter Book number changes.

1986	13,314	937	(134)	14,117
1987	9,388	842	(7)	10,223
1988	13,856	1,275	(93)	15,038
1989	13,216	1,806	(295)	14,727
1990	10,620	2,136	110	12,866
1991	15,734	1,579	148	17,461
1992	8,791	1,308	475	10,574
1993	9,776	792	357	10,925
1994	11,787	1,761	61	13,609
1995	10,771	1,270	187	12,228

Column (5) = Column (1) + (2) + (3).

Base period table has Column (4) which is titled "2/3 of Weir No. 2 Chart & Calculated Flow" with a 5 yr average of 402 AF. Quantities in parentheses are negative values, net gain to the Canal from storm flow into Mockingbird Canyon Lake

Deliveries shown in Column (1) above are those made to the lands of shareholders in areas which are not tributary to the Riverside Narrows.

* Since the canal was converted to a pipeline from the headworks to about Weir No. 2 in 1975, the canal losses in the Arlington Basin are assumed to equal 2/3 of the total loss. Previous to 1975, the losses were assumed to occur equally along the entire canal, half above Weir No. 2 and half below.

Data is from the Gage Canal Company Records.

Export from the basin is the deliveries to the stockholder plus net increase storage in Mockingbird Lake is export plus the losses that are also outside the basin.

Column (5) = Column (1) + (2) + (3).

Quantities in parentheses are negative values, net gain to the Canal.

Deliveries shown in Column (1) above are those made to the lands of shareholders
in areas which are not tributary to the Riverside Narrows.

* Since the canal was converted to a pipeline from the headworks to about Weir No. 2 in 1975,
are assumed to equal 2/3 of the total loss. Previous to 1975, the losses were assumed to occur
the canal losses in the Arlington Basin half above Weir No. 2 and half below.

It was further assumed that 2/3 of the lower canal losses occurred in the Arlington Basin.

Data is from the Gage Canal Company Records.

Export from the basin is the deliveries to the stockholder plus net increase storage in Mockingbird Lake is export
plus the losses that are also outside the basin.

Prior to 1968, these wells were owned by Rubidoux Community Services District.

Sunnyslope #6 & #7 were abandoned in 1981. Sunnyslope #3 casing collapsed & well abandoned in 2000.

Beginning in 1988, the Sunnyslope Wells were being used to deliver water for the Jurupa Water Company Shareholders.

* In 1999, JCSJ started making non-potable deliveries to the Quarry Hills Golf Course which is located in Riverside South Basin

TABLE NO. 10

DELIVERIES MADE BY RUBIDOUX COMMUNITY SERVICES DISTRICT *
TO AREAS WHICH ARE NOT TRIBUTARY TO THE RIVERSIDE NARROWS

(All Quantities are in Acre Feet)

Calendar Year	Total Number of Metered Connections	Annual Water Productions Per Meter (A.F./Meter)	Total Water Production Delivered	Delivery to Boise Cascade Mobile Home Park	Total Water Delivered to Chino Basin	Flow returned to sewer (40% of Total Delivery)	Total Export from Riverside Basin Area

2025										

Notes:

Column (3) = Column (1) x Column (2)

Column (5) = Column (3) + Column (4)

Column (6) = Column (5) x 40%

40% is the average of 2001-2011 RCSD wastewater to Riverside/RCSD consumption

Column 6a = from RSCD records - Column added during 2010 verification

Column 6a =Column 5 - Column 6

Column (6b) added during 2010 Verification

Column (6c) added during 2011 Verification

Column (7) = Column (5) - Column (6)

Column 7 = Column 6a + Column 6b + Column 6c

* Area was served by Jurupa Hills Water Company prior to 1968.

1) During 2011 verification received new water service count

2) 0.85 AF/DU RCSD concurs is a reasonable use

3) Mobile Home Park uses estimated at 0.37 af/du * 325 units for 1996-2009

4) Starting in 2008 from RCSD non-potable system account # 1502301000

5) Starting in 2010 report, actual metered water deliveries to the Park

6) Column 6c had not been included in totals, corrected during 2013 verification

Quality Adjusted Return Flow Resulting from Imported Water Delivered to Areas Tributary to the Narrows	11	331	345	305	346	330	358	331	255	302	398	

- 1 Imported water delivered by Western to domestic customers in areas tributary to the Riverside Narrows.
- 2 Imported water delivered by Western to agricultural customers in areas tributary to the Riverside Narrows.
- 3 The sum of imported water delivered by Western in areas tributary to the Riverside Narrows.
- 4 Imported water purchased by the City of Riverside through MWD connection WR-24C and delivered to areas tributary to the Riverside Narrows.
- 5 Extraction of additional water by Western, or any Plaintiff, from the San Bernardino Basin Area made pursuant to any Judgment Paragraph VI (b) 6 Agreement that provides for extraction of additional water in exchange for Western's purchase of a like amount of imported recharge water.
- 6 The sum of all imported water deliveries to areas tributary to the Riverside Narrows.
- 7 36 percent of imported water delivered to areas tributary to the Riverside Narrows.
- 8 TDS in mg/L of State Water Project water from the Henry J Mills Treatment Plant. Prior to 1980, imported water was delivered from the Colorado River Aqueduct at Lake Mathews.
- 9 TDS (mg/L) of return flow from delivered water in areas tributary to the Riverside Narrows. TDS of return flow is greater than TDS of delivered water as a result of consumptive use.
- 10 Judgment Paragraph XI(a) provides for adjustments for water quality of imported water returned to areas tributary to the Riverside Narrows using the following formula from the Orange County Judgment: Adjustment = $[11 * (Q/15250) * \Delta TDS]$. In the case where the TDS of return flow is less than 600 mg/L, the quality adjustment results in a positive value. In cases where the TDS of return flow is greater than 700 mg/L, the quality adjustment results in a negative value. In cases where the TDS of return flow is greater than 600 and less than 700, no adjustment for water quality is required.
- 11 The quality adjusted return flow from delivery of imported water delivered by both Western and the City of Riverside in areas tributary to the Riverside Narrows. For calendar years 1971 through 1991, no data are available. The only information available is the amounts of Return from Imported Water published in the Western San-Bernardino Watermaster Annual Reports prior to April 1, 2014 (Table No. 16).

- 10 Judgment Paragraph XI(a) provides for adjustments for water quality of imported water returned to areas tributary to the Riverside Narrows using the following formula from the Orange County Judgment: Adjustment = $[11 * (Q/15250) * \Delta \text{TDS}]$. In the case where the TDS of return flow is less than 600 mg/L, the quality adjustment results in a positive value. In cases where the TDS of return flow is greater than 700 mg/L, the quality adjustment results in a negative value. In cases where the TDS of return flow is greater than 600 and less than 700, no adjustment for water quality is required.
- 11 The quality adjusted return flow from delivery of imported water delivered by both Western and the City of Riverside in areas tributary to the Riverside Narrows. For calendar years 1971 through 1991, no data are available. The only information available is the amounts of Return from Imported Water published in the Western San-Bernardino Watermaster Annual Reports prior to April 1, 2014 (Table No. 16).

TABLE 11

CREDIT FOR RETURN FLOW RESULTING FROM DELIVERY OF
IMPORTED WATER IN AREAS TRIBUTARY TO THE RIVERSIDE NARROWS

(All Quantities in Acre Feet Unless Otherwise Stated)

		2011	2012	2013	2014	2015	2016	2017	2018	2019	2020
Western Imported Domestic Water Deliveries	1	5,692	6,205	5,980	6,187	4,710	4,539	4,926			
Western Imported Water Agricultural Deliveries	2										
Subtotal of Western Imported Water Deliveries	3	5,692	6,205	5,980	6,187	4,710	4,539	4,926			
City of Riverside Imported Domestic Water Deliveries	4	5	0	0	0	0	0	0			
Imported Water Recharged in and Extracted from SBBA	5	0	0	0	0	0	0	0			
Total Deliveries of Imported Water	6	5,697	6,205	5,980	6,187	4,710	4,539	4,926			
Imported Water Return Flow Tributary to Narrows (at 36%)	7	2,051	2,234	2,153	2,227	1,696	1,634	1,773			
TDS of Delivered Water (mg/L)	8	170	290	310	332	341	294	176			
TDS of Return Flow from Delivered Water (mg/L)	9	307	524	560	600	616	531	318			
Amount of Adjustment Based on Quality of Imported Water	10	433	122	62	0	0	81	361			
Quality Adjusted Return Flow Resulting from Imported Water Delivered to Areas Tributary to the Narrows	11	2,484	2,356	2,215	2,227	1,696	1,715	2,134			

- 1 Imported water delivered by Western to domestic customers in areas tributary to the Riverside Narrows.
- 2 Imported water delivered by Western to agricultural customers in areas tributary to the Riverside Narrows.
- 3 The sum of imported water delivered by Western in areas tributary to the Riverside Narrows.
- 4 Imported water purchased by the City of Riverside through MWD connection WR-24C and delivered to areas tributary to the Riverside Narrows.
- 5 Extraction of additional water by Western, or any Plaintiff, from the San Bernardino Basin Area made pursuant to any Judgment Paragraph VI (b) 6 Agreement that provides for extraction of additional water in exchange for Western's purchase of a like amount of imported recharge water.
- 6 The sum of all imported water deliveries to areas tributary to the Riverside Narrows.
- 7 36 percent of imported water delivered to areas tributary to the Riverside Narrows.
- 8 TDS in mg/L of State Water Project water from the Henry J Mills Treatment Plant. Prior to 1980, imported water was delivered from the Colorado River Aqueduct at Lake Mathews.
- 9 TDS (mg/L) of return flow from delivered water in areas tributary to the Riverside Narrows. TDS of return flow is greater than TDS of delivered water as a result of consumptive use.
- 10 Judgment Paragraph XI(a) provides for adjustments for water quality of imported water returned to areas tributary to the Riverside Narrows using the following formula from the Orange County Judgment: Adjustment = $[11 * (Q/15250) * \Delta \text{TDS}]$. In the case where the TDS of return flow is less than 600 mg/L, the quality adjustment results in a positive value. In cases where the TDS of return flow is greater than 700 mg/L, the quality adjustment results in a negative value. In cases where the TDS of return flow is greater than 600 and less than 700, no adjustment for water quality is required.
- 11 The quality adjusted return flow from delivery of imported water delivered by both Western and the City of Riverside in areas tributary to the Riverside Narrows. For calendar years 1971 through 1991, no data are available. The only information available is the amounts of Return from Imported Water published in the Western San-Bernardino Watermaster Annual Reports prior to April 1, 2014 (Table No. 16).
